GOOD SEEDS
AT FAIR PRICES
1899
RUTH
NORTHROP, KING & CO.
SEED GROWERS
26, 28, 30 & 32 HENNEPIN AVE., MINNEAPOLIS, MINN.
**To Seed Buyers.**

There are three classes of Seed Catalogues.

One class caters to the patronage of those who are misled by overdrawn pictures and statements that are deliberately untruthful.

Another class takes advantage of the fears of those who through their natural desire to secure the best seeds, will pay fancy prices for what often proves to be very ordinary stock.

There is yet another class which seeks the trade of those who want the best seeds possible to procure and are willing to pay a reasonable price for them.

To this class our Catalogue belongs. Our Seeds we believe to be as good as can be obtained anywhere.

Our descriptions are brief and accurate.

Our illustrations are true to nature.

Our prices are reasonable.

We trust that our efforts to simplify the task of selection and dignify the sale of seeds will meet with the approval of intelligent purchasers.

Respectfully,

**Northrup, King & Co.**

Minneapolis, Minn., Jan. 1, 1899.

---

**Modes of Ordering and Sending Money.**

SEEDS BY MAIL.—Please remember that our prices include PREPAYMENT OF POSTAGE by us on all Seeds ordered by the PACKET, OUNCE, POUND, PINT or QUART; also on PLANTS and BULBS. Deduct 8 cents per pound from postpaid prices on Seeds ordered sent by Express or Freight.

SEEDS BY EXPRESS OR FREIGHT.—We deliver Seeds to any Express or Railroad Company in Minneapolis, the purchaser to pay transportation charges upon receipt of goods. Deduct 8 cents per pound from postpaid prices on seeds ordered sent by Express or Freight. When possible, give full shipping instructions. In the absence of these particulars we will use our best judgment.

PURCHASING BY EXPRESS.—Express Offices have now purchasing departments in all their offices. If you wish to order goods from us to be sent by Express, ask for a purchasing order blank at any Express Office, and it will be supplied and forwarded by them without extra charge, other than the usual rates for returning goods.

NAME, ADDRESS, ETC.—When ordering, give name and full address. Many orders reach us a year season in which the Name or Post Office address is lacking. It is of course impossible for us to fill these orders until they are identified.

HOW TO SEND MONEY.—Money can be sent safely either by P. O. Order, Bank Draft, Express Order or Registered Letter. If your order amounts to $1.00 or more, it is best to send by one of the above methods. Postage Stamps received the same as Cash.

---

**Northrup, King & Co.'s "Primers."**

There is a great demand for practical instruction on Farming and Gardening subjects. Enough books are written, but they do not, as a rule, touch the spot. They say too much; they tell too little. Farmers do not have time to wade through page after page of dry, impractical matter; to "search the haystack for the needle." They want Information, and they want it in such shape that they can apply it to their own needs.

Earnestly desiring to be identified with that which is highest and best in progressive agriculture, we have adopted the plan of issuing a series of PRIMERS on Agricultural Subjects, written for us by the best authorities on the matters of which they treat.

These PRIMERS will appear from year to year in pamphlet form, printed on good paper, finely illustrated and of uniform size, so that, if desired, they may be bound in book form.

For particulars of our PRIMERS see page 1.

These PRIMERS will not be sold. They will be given to customers who purchase Seeds from this Catalogue to the value of fifty cents, and who ask for them when ordering.

SPECIAL NOTICE.—Do not overlook our folder, "The Farmer's Garden." (See page 31.) It is sent free to our customers who request it when ordering.
FARM SEEDS
From the World’s Golden Grain Belt.
Pages 2 to 20.
The whole drift of trade toward the natural source of supply has led us to devote unusual peculiarities of the culture of improved farm seeds, the result being that we have become the largest growers in the United States.
We offer Northern grown stocks of the best varieties, carefully selected, thoroughly re-cleaned, and at prices so reasonable as to enable every farmer who wishes to get a start in seed oats, wheat, barley, corn, etc., to do so at a very small expense.
Please note our liberal terms of sale, viz.: If any seeds received from us are not satisfactory on receipt and examination, they are to be returned at our expense, and the money that has been paid for them will be refunded.

VEGETABLE SEEDS.
Pages 20 to 44.
Our list of Vegetable Seeds comprises the best varieties only. Attention is called to the fact that in listing sizes we mention the number of seeds to be found in our packets that an order for Vegetable or Flower Seeds in packet seeds, amounting to 75 CENTS, entitles the purchaser to a FREE packet of our SCHOOL GARDEN FLOWER MIXTURE, and to the privilege of competing for the $150.00 CASH PRIZES.

FLOWER SEEDS AND BULBS.
Pages 44 to 53.
Our list of Flower Seeds embraces all the popular and easily grown varieties, as well as the best novelties of recent introduction. It will be noted that all along the line we have made radical reductions in PRICES, and, in so doing, we have sacrificed neither quality nor quantity. Our Flower Seeds are the finest obtainable.
Our Packers, we believe, contain MORE SEEDS, in proportion to price asked than those put out by any other house.
Notice that an order for 10 or more packs of Vegetable Seeds in packets, to the value of 75 CENTS, entitles the purchaser to a FREE package of our SCHOOL GARDEN FLOWER MIXTURE, and to compete for the $150.00 CASH PRIZES.

LAWN SEED.
Page 56.
We cannot too highly commend our “STERLING” Lawn Seeds. The fact that during the past fifteen years we have sold over 20,000 bushels of this mixture speaks more strongly as to the satisfaction it has given than any words we could utter in its praise. The grasses used in our “STERLING” Lawn Mixture are analyzed to purity and tested as to germination. We send it to all parts of the United States. If you want a GOOD LAWN, try our “STERLING” Lawn Grass.

OUR “PRIMERS”
Free to Customers.
The desire to closely identify ourselves with the interests of our customers has led us to issue a series of pamphlets on agricultural subjects, written by the authorities on the subjects of which they treat. These pamphlets, or “Primers,” as we call them, will appear from year to year and will be of permanent size, so that, if desired, they can be eventually bound in book form. We shall endeavor to have the contents of each succeeding Primer so notable in its character as to render unnecessary the suggestion that they be carefully preserved.
Our primary object in issuing these PRIMERS is to obtain new customers. We are in hopes that the desire to obtain the Primers will turn some orders our way that might otherwise go elsewhere, for once we secure a customer, we usually manage to keep him. These Primers, therefore, we call “FREE,” and, as will be sent only to those who purchase seeds from this catalogue to the value of 50 CENTS. A purchase from this catalogue amounting to $10.00 entitles the buyer to the Primers. A purchase amounting to $1.50 secures both.

PRIMER NO. 1.
Shaw’s New System of Pasturing Sheep.
By Thos. Shaw.
Is from the pen of Prof. Thos. Shaw, of the University of Minnesota. It treats of the pasturing of sheep on native grasses for the protection and improvement of the soils, and the raising of sheep has been accepted by the agricultural societies in every state in the Union.

PRIMER NO. 2.
HOW TO SOW GRASS AND CLOVER SEEDS.
By W. J. Beal.
Each year we receive a great many requests for information regarding the sowing of grass and clover seeds, and it is very difficult to answer these questions properly within the limits of a letter, so we decided that Primer No. 2 should treat on this important subject.
It has been written for us by Prof. W. J. Beal, of the Michigan Agricultural College, author of Grasses of North America, and the leading authority on the subject. It will be found that this Primer contains information vital to every one who sows grass and clover seeds, no matter how experienced they may be.
Remember that these “Primers” do not cost our customers one cent.

CASH PRIZES
Particulars of a very interesting contest will be found in the four-page insert between pages 28 and 29 of this book. It will be noticed that $50.00 is paid for the GREATEST NUMBER OF species produced from a single packet of our SCHOOL GARDEN FLOWER MIXTURE, $30.00 in cash for the FINEST PHOTOGRAPH OF THE GARDENS raised from that mixture, $20.00 in cash for the BEST ESSAY on how to secure for the purchaser a COMPLETE FLOWER GARDEN.
It will be seen that such a contest will secure for the purchaser a COMPLETE FLOWER GARDEN. NEVER BEFORE WAS SUCH VALUE IN FLOWER SEEDS OFFERED FOR THE MONEY. Notice, too, that a full size packet of our SCHOOL GARDEN FLOWER MIXTURE is sent FREE as a premium to those purchasing VEGETABLE or PRIMER No. 1 SEEDS, and 75 CENTS, two packages where the order amounts to $1.50, etc., the purchaser being entitled to COMPETE FOR THE $150.00 IN CASH PRIZES.
NORTHERN GROWN FARM SEEDS CAREFULLY SELECTED FROM THE WORLD'S GOLDEN GRAIN BELT.

It has become a well established principle of agriculture that the farther North seeds can be grown and fully matured, the better they are. While this truth applies with equal force to nearly every kind of seed, the Northwest became so quickly famous for its cereals as to cause farmers everywhere to turn here for their supply in that direction. This tendency has come so well recognized amongst the trade that many seedsmen of the East and Middle West have almost dropped Field Seeds from their catalogues.

The whole drift of trade towards the natural source of supply has led us to devote unusual attention to the culture of improved farm seeds, the result being that we have become the largest growers in the United States of fine seed grain, etc.

All practical farmers agree that seed, grown year after year under the same conditions of soil and climate, "runs out" after a time, rendering a change of seed not only desirable but necessary.

Therefore we offer Northern stocks of the best varieties, carefully selected, thoroughly re-cleaned, and at prices so reasonable as to enable every farmer who wishes to get a new start in seed oats, wheat, barley, corn, etc., to do so at a very small expense.

Please note our liberal terms of sale, viz., if any seeds received from us are not satisfactory on receipt and examination, they are to be returned at our expense and the money that has been paid for them will be refunded.

IF FINE TABLE and LONG KEEPING qualities, combined with GREAT PRODUCTIVENESS, ever warranted the introduction of a potato, we are justified in sending out the PINGREE, believing that it will find favor with all who grow it, and that it will take care of itself in the battle for popular favor.

The PINGREE is a main crop potato; is productive to an extraordinary degree. The tubers are bunched closely in growing, which materially lessens the labor of harvesting. The potato itself is of the size and shape most liked in the leading markets. The skin is of a bright, light russet color. Eyes are few and nearly flush with the surface. In quality nothing can surpass it. In fact, in this particular we know of no sort that equals it. Its snowy whiteness, when cooked, together with its dry and doury nature, has made it a favorite on every table where it has been tried.

PRICE.

The very reasonable price at which we offer this potato will enable all who are disposed to try it to do so without paying the extravagant rates usually asked for new varieties. We are sure that all who try it will be greatly pleased with their investment. Pound, 25c; three pounds, 60c; post-age paid. By express or freight at purchaser's expense, peck, 75c; bushel, $2.25; barrel of three bushels, $5.00.

PINGREE POTATO EYES BY MAIL.

It has been conclusively proven that potatoes cut to single eyes give the largest yield and best results generally. They can be sent without danger of freezing, and by our improved method of preparing for shipment, will keep in good condition for months. One hundred eyes of the PINGREE potato will be sent postpaid to any address on receipt of One Dollar, and are warranted to reach the purchaser in good condition for planting.
NORTHROP, KING & CO.'S EXTRA EARLY OHIO POTATOES.

EXTRA EARLY OHIO POTATOES. Northrop, King & Co.'s Special Stock. We consider these to be the earliest, purest and altogether the handsomest stock of Early Ohio Potatoes to be found anywhere. On these points, we challenge comparison with stock from any other source. We do not admit that its equal exists among Early Ohio Potatoes. They are grown under conditions that make them cost more than common stock, they are selected with the utmost care, and the result is grand, such as to delight everyone who knows and appreciates a good potato. Everyone of them is a "picture" of what an Early Ohio Potato should be. Stock Limited.

100 eyes, by mail, postpaid 80c; by freight, peck, 40c; bu., $1.25; bbl., $3.50.

EARLY OHIO. We do not now grow earl pots. Minneapolis is such a large and potato receiving market and shipping point that we have found it to be a better plan to select each year, a few carloads of Ohio out of the many coming each day during the fall and early winter. In this way we have our pick of many thousands of bushels, and we usually have better stock, than if we felt obliged to first dispose of those of our own growth. Our stock will please the buyer.

100 eyes, by mail, postpaid, 60c; peck, 35c; bu., $1.00; bbl., $3.00.

EXTRA EARLY TRIUMPH,—(Bliss.)

This variety has been known for a long time, and yet "unknown." It was introduced many years ago by Mr. B. K. Bliss of New York, who disseminated the Early Rose. The Triumph attained at the time no particular favor, but all of a sudden its virtues became appreciated and the demand for it last season was so great, that it sold readily in carload lots for three times the price of ordinary seed potatoes, and one man who held several thousand bushels reaped a substantial fortune from their sale. There is good reason why the Triumph should be popular. It is from seven to ten days earlier than the Ohio, and that oftentimes means a difference of many dollars in the crop. We believe that potato growers will do well to plant liberally of them the coming spring as there is sure to be an almost unlimited demand for the seed from the Mississippi Valley where thousands upon thousands of acres of potatoes are grown each year for the early market. The illustration is from a photograph of an average specimen. The potato is of good size, squared at ends. Skin is red, flesh is very white and firm. It is productive, and for several years to come, will probably command a higher price among potato buyers than any other sort. Our stock is genuine. Price, 100 eyes, $1.00 by mail postpaid. By freight, peck, 60c; bu., $1.75; bbl., (3 bu.) $4.50; In 10 bbl. lots, @ $4.00.
Northern Grown Seed Potatoes.

No Potatoes grown can be compared with those produced in the North, either for VIGOR and FREEDOM FROM DISEASE, or PRODUCING and LONG KEEPING QUALITIES. Our stock is so fine and our prices so low that it is a particularly favorable time to get into a stock of some of the newer and better sorts.

SHIPMENT will be made at any date ordered, but where no special instructions to the contrary are given, will hold until in our judgment there will be no danger from freezing. Write for special prices on carload or large lots.

EXTRA EARLY VARIETIES.

(Our barrels hold plump 3 BUSHELS.)

EARLY FORTUNE. (New.) A very early variety, sent out with extraordinary claims as to its yielding qualities. It is distinctive in appearance, being longish; flesh and skin white and very attractive. Eyes very prominent. 50c $1.25 $3.50

EARLY SIX WEEKS. It is claimed by the introducer of this potato that it will yield potatoes of marketable size in six weeks after planting. Our trials hardly justify this claim, but it is certainly a very early and a very good potato. Its of excellent quality and yields abundantly. 100 eyes, 60c. 40 1.10 3.00

N., K, & CO.’S EARLY MINNESOTA. The distinguishing characteristics of this potato are its earliness, productiveness, uniformity in size and admirable cooking qualities. When boiled its flesh is almost as white as milk; baked, it has no superior. The uniformity and size is a feature that will be appreciated by all potato growers. 100 eyes, 60c. 50 1.10 3.00

N. K. & CO.'S EARLY MONTANA. Despite the large sale that has been attained in a shape, new to late potatoes that are being constantly introduced, there are a great many who contend that Early Rose is the peer of them all. It is certainly true that a pure, healthy stock of Early Rose potatoes has been difficult to obtain. In our judgment the Montana Rose will fully satisfy those who are looking for a first-class, healthy Early Rose Potato. 100 eyes, 60c. 50 1.10 3.00

PEARL OF SAVOY. Introduced some years ago by a Boston firm. It was first made at the Rural New Yorker Experimental Farm the potatoes were dug July 29th, and gave a yield of 699 bushels to the acre, 18½ potatoes to the hill. It will thus be seen that they are very early and very productive. 100 eyes, 60c. 40 .90 2.75

INTERMEDIATE VARIETIES.

(Our barrels hold plump 3 BUSHELS.)

CARMAN NUMBER 1. New. Finest second early potato grown. Handsome. Uniformly large. An enormous yielder. Skin and flesh very white. Quality perfect. Were sold in 1894 at $35.00 a barrel. 100 eyes, 60c. 40 1.10 3.00

RURAL NEW YORKER NO. A similar and likeable potato, which we this season are sending with a table quality. Very few eyes. 100 eyes, 60c. 40 1.10 3.00

N. K, & CO.'S IDEAL. Introduce by us in 1892, and we consider it ideal in name, quality, flavor, size, appearance and productiveness. 100 eyes, 60c. 50 1.15 3.25

THE FREEMAN. This potato has met with a wide sale, largely, no doubt, on account of the liberal advertising it received, but deservedly so, for its productiveness and other excellent qualities. Tubers of desirable size and shape: skin white and russet; flesh white and firm; and flattened eyes almost even with the surface and inconspicuous. 100 eyes, 60c. 50 1.15 3.25

LATE VARIETIES.

(Our barrels hold plump 3 BUSHELS.)

CARMAN NUMBER 3. A magnificent late potato. An extraordinary cropper. Tubers are very large, handsome and of finest quality. 100 eyes, 60c. 40 1.00 3.00

MAGNIE MURPHY. This is a very late variety, and here is a chance to get a late potato maturing. An abundant yielder. Thrives best on light soil. 100 eyes, 60c. 50 1.15 3.50

EMPIRE STATE. A standard late sort. Skin white, smooth. Flesh white, juicy. 100 eyes, 60c. 40 1.00 2.75

WHITE STAR. A standard late sort. 100 eyes, 60c. 40 1.00 2.75

MONTANA WONDER. While this is the largest potato grown, it is also of excellent quality, extraordinarily productive and an excellent keeper. The stock now in our cellars average to tuber about 1½ lbs. in weight and 6½ inches in length. 100 eyes, 60c. 50 1.25 3.50

POTATO EYES BY MAIL.

This special collection of 25 eyes each of N., K. & Co.'s Extra Early Ohio, Extra Early Triplo, Carman No. 3 and N. K. & Co.'S PINGREE, will enable all who wish to secure the genuine stock of these four grand varieties to secure same at very slight expense, and without freight charges. Remember that we warrant them to reach the purchaser in good growing condition, and that they will keep so until planting time. PRICE, by mail postpaid, $1.00.

We believe that we are the originators of the system of sending potato eyes by mail. There are numerous advantages in procuring them in this shape. First: it has been conclusively proven that potatoes cut to single eyes give the largest yields and best results generally. Second: No freight charges to pay. Third: They can be sent without incurring this risk. Fourth: By our improved method of preparing the eyes for shipment, they will keep in good condition for months.

N., K. & Co.'s "PINGREE" POTATO. The best MAIN CROP potato ever offered. See page 2.
The following statement from one of the most prominent authorities on Agriculture in the Northwest speaks volumes in showing the superior quality of our Swedish Turnips (Rutabagas) Mangel and other Root Seeds:

"For eight years I have used your seeds with the greatest success. I wish especially to commend your Mangel and Rutabaga Seed as the best I ever used. My experience in farming covers a period of over 20 years, during which time I have rarely cultivated less than ten to twenty acres of Mangel Wurzel and Swedish Turnip. As a stock breeder, I have always considered them my most important crops. I have bought seed from nearly every prominent house in the United States and Canada, and sometimes have imported it direct from England, but I NEVER HAVE I HAD THE UNIFORMLY GOOD RESULTS THAT YOUR SEED HAS GIVEN ME. In North Dakota, where I had the largest herd of thoroughbred cattle, I AVERAGED FROM TWENTY TO THIRTY TONS OF ROOTS TO THE ACRE. Later, as manager of Mr. J. J. Hill's, stock farm at North Oaks, my tonnage was not quite as heavy, owing to the lighter character of the soil, but in SHAPE, SIZE and UNIFORMITY the roots have always been as nearly perfect as any man could wish."

Yours, etc.,

C. J. ALLOWAY.

NOTE.—We value very highly the above expression from Dr. Alloway, who was State Veterinarian for North Dakota for three years; for a long time President of the Swede Stock Growers' Association of North Dakota; Lecturer to State Agricultural College at Brookings, S. D.; Director in Grand Forks County Agricultural Society, and one of the largest, most progressive and successful stock breeders in the U. S.

Dr. C. J. Alloway.

A Field of N. K. & Co's Prize Winner Rutabaga.

N. K. & Co's Prize Winner Rutabaga. Prize Winner is a purple-topped variety, growing to a large size, with a single tap root and very small and fine top, short neck, smooth and symmetrical; is a certain cropper. It produces a very heavy weight per acre, and keeps sound and good until late in the spring. From reports received from those who have grown it, we do not hesitate to say that we possess the Handsomest and Best Stock of purple top Rutabagas in cultivation. We have sold many thousand pounds of this magnificent strain and have never received a single complaint about them. Large pkt. 5c; oz. 10c; ½ lb. 15c; lb. 30c; postpaid. By freight, 1 lb. 40c; 5 lbs. $1.75; 10 lbs. $3.25.

Carter's Imperial Hardy Swede. A standard English variety which produces extraordinary crops. Large pkt. 5c; oz. 10c; ½ lb. 15c; lb. 40c; postpaid. By freight, 1 lb. 30c; 10 lbs. @ 25c.

Sweet German. One of the very best sorts on account of its productiveness and quality. This consideration should count strongly with stock growers, all understanding that the quality of the feed regulates the quality of the product. Large pkt. 5c; oz. 10c; ½ lb. 20c; lb. 50c; postpaid. By express or freight, 1 lb. 40c; 5 lbs. $1.75.

Hurst's Monarch Swede. We first saw this splendid variety in England, and were the first to bring it to the attention of the American trade. It is very distinct in type, being of tankard shape. On account of the size it attains, it will yield from two to seven tons more to the acre than any other variety. Pkt. 5c; oz. 10c; ½ lb. 20c; lb. 60c; postpaid. By express or freight, 1 lb. 50c; 5 lbs. $2.25; 10 lbs. $4.00.

Northrup, King & Co., Seed Growers, Minneapolis, Minn.

We have a very fine trade on Mangel seed, and are careful to see that our stocks keep pace with all the improvements that are being made from year to year.

We have our seed grown under contract in England by experts in that line, as there is no place in the world where Mangel and Ruta Baga are produced in such perfection. Mangel and Ruta Baga Seed can be grown in the South of France for less than one-half the price we pay for our seed, but as it cannot be depended upon to give satisfaction, we do not handle it.

Improved Mammoth Long Red. Our stock is a great improvement on the old variety. The roots are very large, uniformly straight and well formed. Color deep red. Roots solid. Tops small. Roots attain a large size. Produce an immense bulk and tonnage. Oz., 5c; ¼ lb., 15c; lb., 40c postpaid. By express or freight, lb., 30c; 5 lbs., @ 25c lb.

Mammoth Golden Giant Mangel. Very Large. Remarkably even in shape, of vigorous growth; has a fine neck and a very smooth skin. Flesh white, firm and sweet, much liked by cattle. Easily lifted from the ground, producing enormous crops. Excellent keeper, yields 40 to 50 tons per acre. Oz., 5c; ¼ lb., 15c; lb., 45c postpaid. By freight, lb., 35c; 5 lbs., @ 30c per lb.

Red Globe Mangel. Similar to the Yellow Globe in general character, and, like it, well adapted to shallow soils. Oz., 10c; ¼ lb., 15c; lb., 40c. By freight, lb., 30c; 5 lbs., @ 25c.

Champion Yellow Globe Mangel. A favorite variety, very productive, easily pulled and a good keeper. It is spherical in shape, orange-yellow color, top tinged with green; flesh of the root white, firm and sugary. One of the best for light soils. Oz., 10c; ¼ lb., 15c; lb., 40c, postpaid. By freight, lb., 30c; 5 lbs., @ 25c, per lb.

Taber's Gate Post Mangel. This is the production of one of the largest mangel specialists of England. It is thought by many to be the most profitable of all mangels, and is exceedingly popular in those sections where it is best known. It resembles somewhat the Golden Tankard in appearance, but is not so large; skin is yellow and smooth; flesh white and very firm. Oz., 8c; ¼ lb., 15c; lb., 45c postpaid. By express or freight, lb., 35c; 5 lbs., @ 30c.

Improved Golden Tankard. We have for years insisted that this was the best mangel grown, and each season strengthens us in the position we took when it was a comparatively unknown sort. We recommend it unqualifiedly as the best mangel by far for dairy farmers. It combines apparently all the fine points possible to condense into a mangel. The illustration (engraved from a photograph) shows the shape. The color is a deep rich yellow. The flesh is yellow and white in rings beautifully alternating with each other. On account of its shape enormous crops are grown, and it is easily lifted from the ground. Oz., 8c; ¼ lb., 15c; lb., 40c, postpaid. By express or freight, lb., 30c; 5 lbs., @ 25c.

I have lived here eight years and never saw such a miserable, backward spring as the last one, but I can cheerfully write you that I have an A Number 1 garden. Every seed grew, and I have the finest vegetables in this locality, both as to quality and quantity. (Signed.) S. M. WARMAN, Sandstone, Minn.

The Kentucky Wonder Melon was a complete surprise. From one ounce of seed have picked half a wagon load, some of which weighed 40 lbs., and more yet on the vine. It beats anything I ever saw.

(Signed.)

E. E. BALDWIN, Ada, Kansas.

FOR SUGAR BEET, SEE PAGE 7.
CARROTS FOR STOCK.

Northrup, King & Co.

No one who feeds stock can afford to be without Carrots. I feed each year Mangels Wurzel, and Ruta Baga, and them very high. Without Carrots I consider indispensable. I increase my acreage of Carrots each year, and believe I can secure better proportionate results from their use than from anything else I feed. As to varieties, nothing can be better in point of quality and great productiveness, than your Victoria (yellow), and Mastodon (white). I use them both, and have never yet seen them equalled. In this connection I am glad to express the unqualified satisfaction your seeds have given me in the many years I have traded with you.

Very truly yours,
N. P. CLARKE.

SPECIAL OFFER.

In order that our customers may test the comparative merits of these two grand Carrots, we will send to any address, postpaid, to any part of the United States, one pound each of the Mastodon and Victoria Carrots for $1.50. Eight cents per pound can be deducted if sent by express or freight at purchaser’s expense.

N. K. & Co’s MASTODON Carrot. This is the heaviest cropping Carrot grown, yielding more tons to the acre than any other sort. The flesh is white, crisp, solid and very sweet in flavor. It is a vast improvement on the white and green Belgian sorts which have been such favorites in the past, as it is not only much more productive but vastly easier to handle. The roots are short and very heavy at the shoulder, rendering them easily harvested. An important feature, also, is that they do not easily break in pulling or storing. Too much can scarcely be said of their size and great productiveness. The roots frequently measure 15 to 26 inches in circumference, and 18 to 25 tons to the acre is not an extravagant statement as to the yield. Large Pkt. 10 cts; ½ lb. 30 cts; ¼ lb. 50 cts; 1 lb. 90 cts; 1 lb. 5 lbs. $3.75, by mail, postpaid.

White Belgian. Grows long; green top, well out of the ground. Large Pkt., 5 cts; ½ lb. 20 cts; ¼ lb. 30 cts; 1 lb. 50 cts; 5 lbs. $8.00, by mail, postpaid.

Yellow Belgian. Similar to the white, but yellow in color. Large Pkt., 5 cts; ½ lb. 30 cts; ¼ lb. 50 cts; 1 lb. 80 cts; 5 lbs. $10.00, by mail, postpaid.

"THE FINEST CARROTS I EVER SAW."—JACOB GINTZ, Huntington, Ind., writes: "Your Mastodon are the finest I ever saw. I had several weighing 3½ lbs.

"SIMPLY GRAND."—Your Mastodon Carrots are truly grand as are also the Victoria. Dwarf Essex Ripe is extra good and also your Early Minnesota sugar cane. I am well pleased with your seeds."—GEORGE ALLEN, Allerton, Ill.

"FIRST PRIZE IN NORWAY."—"My cousin in Norway, to whom I sent some Carrot Seed from your house, writes me that he took first prize at their fair with the Victoria Carrot, and that they attracted great attention on account of their size and solidity."—NILS MICHELET.

SUGAR BEET.

Klein Wanzlebener and Vilmorin's have thus far proven most successful for this country. Our stocks of these two celebrated sorts are known as "Elite" Strains, meaning choice; select. This Elite seed is grown only from roots, (each of which is analyzed) which show the highest percentage of sugar and co-efficient of purity. The Elite strains are the only ones that should be planted by those wishing to grow high grade sugar beets. Vilmorin, Elite. This beet is the result of thirty-five years of methodical and persevering selection. In black soils, rich in organic matter, and adapted to the larger variety. It is extremely rich in sugar, thousands of analyses showing that the percentage of sugar which can be obtained from this variety, is about sixteen. Its average yield may be stated as from 12 to 16 tons per acre. Pound 45c; postpaid. By express or freight, Lb. 35c; 5 lbs. @ 30c; 10 lbs. @ 25c; 50 lbs. @ 20c; bags included.

Klein Wanzlebener, Elite. This variety at the present time, has probably a wider cultivation than any other sugar beet. It may be distinguished from the Vilmorin by its lighter color and its lighter colored leaves, which are beautifully undulating, and scalloped about the edges. While not as a rule equal to the Vilmorin in saccharine richness, it is considerably more productive. Pound 45c; postpaid. By express or freight, Lb. 35c; 5 lbs. @ 30c; 10 lbs. @ 25c; 100 lbs. @ 20c; bags included.

SUGAR BEET FOR STOCK FEEDING.

We can furnish ordinary seed of Klein Wanzlebener, Vilmorin, Lane's Improved, Imperial and French White Sugar at the following prices: Lb. 30c; postpaid. By express or freight, 10 lbs. @ 15c; 100 lbs. at 10c. Bags included. In ordering, state variety wanted.
NORTHROP, KING & CO.'S SEED OATS.—Heavy, Vigorous, Productive.

NORTHROP, KING & CO.'S LINCOLN OAT. An Agricultural Wonder. Its record has never been equaled. The LINCOLN OAT has an established, undoubted and fully verified yield of 817 bushels and 21 pounds from 7 bushels of Seed.

Obtain your seed direct from the introducers, and secure genuine stock.

Do not neglect the opportunity to secure the seed of this magnificent, unequalled Oat, at the present low price.

We believe the Lincoln Oat to be the best ever introduced. The claims we made for earliness, freedom from rust and enormous-yielding qualities when first sending it out, have been fully sustained on every point and from all sections. Hundreds of customers have written us that on account of its stiff straw, it stood up perfectly under weather that caused all other varieties to lodge. It is the best and most economical Oat for feeding, on account of its thin hull, heavy meat and soft nib. Price of Lincoln Oats: Per bu. of 22 lbs., 80 cts.; 2 bush., $1.50; 10 bush., $6.00; 20 bush., $11.00; 100 bush., $50.00. Sacks included. Delivered to R. R. Minneapolis.

Why plant unknown varieties or run out stock, when you can get true stock of Lincoln Oats from the introducer at these low prices.

N. K. & CO.’S BLACK BEAUTY.

We imported from W. H. Mold, the celebrated English Oat specialist of England, (whose American agents we are,) a few bushels of a very select and high priced variety of black oats which we have named N. K. & Co.’s Black Beauty.

While few black oats are grown in the United States, they take the preference in most European countries, and it is safe to say that in England, two bushels of black oats are grown to one of white.

These black oats are preferred to white, principally on account of their superior yielding qualities, but beside being fully equal to white oats in point of feeding properties, they possess another very valuable characteristic, in the unequalled stiffness and strength of straw. Nothing less than a tornado or a cyclone will lodge them. Mr. J. W. Nesbit, who grew these oats for us, on his farm in Hennepin County, Minnesota, says: “All of my other oats lodged more or less, but these black oats stood up perfectly; the straw was as stiff as hazel brush. We took off from our three-acre field, seven large loads of bundles, about three times as much as any white oats we had.”

Last year sold the Black Beauty oat by the pound only, and reports from customers who tried it in this small way were of a most gratifying character.

We this year offer it by the bushel not more than two bushels to any customer. Lb., 25 cts. by mail post paid. By express or freight: peck, $1.00 bush., $3.00; 2 bush., $5.00. Bags included.

NEW ZEALAND RUST PROOF.

This variety was introduced into this country by means of a small package sent some years ago by a traveler in New Zealand to a friend in Iowa. It is a white side oat with medium sized grain, heads are extra long, heavy and full, averaging about 100 grains each, grows taller than ordinary and is medium early, though several days later than the early round head varieties. Its great hardiness and the strength and stiffness of its straw is remarkable. It stands out extra well and requires less seed per acre than most kinds. It does not rust and unlike all other varieties of side oats has never been known to lodge and instead of having a tendency to deteriorate it seems to improve each year as it becomes more acclimated. Lb., 20 cts.; by mail post paid; by express or freight; peck, 30 cts.; bush., 50 cts.; 2 bush., $1.50; 10 bush., $6.00; 50 bush., $35.00. Bags included.

WHITE RUSSIAN (Improved).

The original stock of White Russian Oats was really a capital Oat, and sprung immediately into great favor. Of late years it has become badly mixed and deteriorated, through not being properly grown. Largely through the efforts of a customer of ours in Dakota, we are able to offer the White Russian in its old time purity. It is a well established fact that the true White Russian is as nearly rust proof as any Oat can well be, and we are confident that many will hail its re-introduction with satisfaction. Lb., 17 cts., by mail, post paid. By express or freight: peck, 20 cts.; bush., 75 cts.; 2 bush., $1.40; 10 bush., $5.50; 20 bush., $10.00. Bags included.

EARLY ARCHANGEL.

The original stock of this Oat was obtained from Archangel, a hamlet in the north of Russia, and since its introduction to this country has been grown with great success. It has proven itself to be absolutely the earliest oat yet introduced; it is a heavy yielder, does well on light soil, and is a most satisfactory Oat in all respects. Its principal attraction is its extra earliness; and by this quality it escapes many of theills which Oats are heir to. The straw is stiff, well glazed and erect. The grain itself is plump, heavy, exceedingly white, and of excellent feeding quality. The seed we offer is of our own growth from the original stock. Lb., 17 cts., by mail, post paid. By express or freight: peck, 30 cts.; bush., 90 cts.; 2 bush., $1.75; 10 bush., $7.50. Bags included.
SPRING WHEAT.

PRICES. We are obliged to ask a considerable advance over the market price for our HIGH GRADE SEED WHEAT, as there is a very much larger cost attached to its production and preparation than any one who has not had the experience could possibly appreciate. Space does not permit of going into details, but, as a matter of fact, the prices named below for the larger quantities represent but a slight advance over the actual cash outlay to us.

We believe that farmers who want to change their seed will find it very much to their advantage to secure enough, at least, to give them a start.

To those who do not care for the pedigree, or highly improved stock, but want simply good, healthy, sound and reasonably clean wheat, we would state that, Minneapolis being the largest wheat receiving city in the United States, we are in position at all times to select, from the hundreds of cars which are daily arriving, excellent lots of either Fife or Blue Stem, and which we will sell either in car or less than car lots, at a slight advance over the prevailing market price. Will be glad to send samples and prices upon application.

Pillsbury Fife Spring Wheat. We consider this to be the best and purest stock of Fife wheat obtainable. Great pains has been taken in its selection. Our stock grades No. 1 Hard and is perfectly sound and healthy, Lb., 20c, postpaid. By express or freight, peck, 60c; bu., $1.75; 2 bu., $3.25; 10 bu., $15.00; 50 bu., $70.00.

Saskatchewan Fife Spring Wheat. Noted for its great productiveness, earliness, vigor and freedom from smut and disease. This wheat has become so well known as to render extended description of it unnecessary. We first brought it to the attention of the trade in 1894, and it has well sustained the claims then made for it, as the earliest and healthiest Spring Wheat. Lb., 20c, postpaid. By express or freight, peck, 50c; bu., $1.00; 2 bu., $3.00; 10 bu., $14.00; 50 bu., $65.00. Bags included.

Velvet Chaff Blue Stem Spring Wheat. A distinct variety from all other spring wheats. The stem, just below the head, when green, has a beautiful blue bloom on it, similar to the bloom on a grape, and which can be removed by passing the finger over the stem. This bloom disappears as the wheat ripens, and the stem and straw assume a beautiful golden yellow hue, and entirely free from rust. Earlier than the Scotch Fife. The kernel is of the hard variety, similar to Scotch Fife, more productive, one of the best spring wheats for milling. Lb., 20c, postpaid. By express or freight, peck, 50c; bu., $1.60; 2 bu., $3.00; 10 bu., $14.00; 50 bu., $65.00. Bags included.

SEED BARLEY.

N. K. & Co.'s Highland Chief Barley. This is a two-rowed, very productive, vigorous grower, less likely to be damaged by wet than most other kinds. It usually weighs quite 50 lbs. to the measured bushel, and is the largest berried and handsomest barley grown. Price, lb., 25c, postpaid. By express or freight, peck, 50c; bu., $1.75; 2 bu., $3.00; 10 bu., $13.00.

New Beardless barley. All barley growers have experienced the annoyance occasioned by the chafing and sticking of the beards while threshing. This nuisance has been overcome in the New Beardless barley, which is entirely free from beards. This barley is six-rowed, the straw grows to a good height, is stiff and strong, and does not readily lodge. The heads resemble smooth wheat, with the exception of a small cork on the point of each grain. This comes off readily in threshing, leaving the threshed grain looking like any other white barley. Price, lb., 20c, postpaid. By express or freight, peck, 50c; bu., $1.50; 2 bu., $2.50; 10 bu., $10.00. Bags included.

Man-hury Barley. This is the best six-rowed barley we ever grew or ever saw. Lb., 20c; 1 lb. 50c, postpaid. By freight or express, peck, 40c; bu., $1.00; 2 bu., $1.50. Bags included.

Blue Stem barley. We have been growing this during the last 15 years, and it has given most excellent satisfaction as a feeding barley. We strongly recommend the White Hulless in its place, but as many will be reluctant to believe that anything can be better than the Black Hulless, we still offer it. Lb., 20c, postpaid; peck, 40c; bu., $1.50; 2 bu., $2.00; 10 bu., $8.50. Bags included.

Don't miss White Hulless Barley. See last cover page.

Mr. R. M. Allen, General Manager, Standard Cattle Co., Ames, Neb.

Northrup, King & Co., Seed Growers, Minneapolis, Minn.
There is no man owning buildings but who sleeps more soundly at night from knowing that they are INSURED. Farmers who plant our TESTED MINNESOTA GROWN SEED CORN are, to a great extent, INSURED.

These are anxious days for the farmer when, with a good crop in sight, he is wondering whether early frosts are not going to catch his corn. Five to ten days in the latter part of the season are very often CRITICAL DAYS. This anxiety and risk can be greatly lessened by planting OUR MINNESOTA GROWN SEEDS. A VAST AMOUNT OF MONEY would be saved to the country each year if farmers would plant seed grown as FAR NORTH AS POSSIBLE.

As the Originators or Introducers of nearly all the Standard Early Varieties of Seed Corn in use today, we consider that we may justly claim to be HEADQUARTERS for Northern Grown Seed Corn, that is NORTHERN GROWN.

A RECOMMENDATION. OUR CORN IS TESTED.

We do not, however, feel like losing an opportunity of strongly urging our customers, WHEREVER they may purchase their seed, to TEST IT BEFORE PLANTING. It is but little trouble to try a few seeds in earth, and in this way the responsibility can be placed where it belongs.

N. K. & CO'S MINNESOTA KING CORN. (Yellow Half Dent) We regard this corn (introduced by us in 1889) as the most valuable early Corn ever sent out. There are various favorable circumstances which will yield as much, but year in and year out, through fair years and lean years, there is, we believe, no sort that will do as well. It seems to possess a faculty of growing right along and making a crop during weather and under conditions that would ruin other varieties. We do not know of any good reason why this should be so, but not only is this our own experience, but we have received like testimony from hundreds to whom we have sold it; the universal expression being that for ability to endure extremes of heat and cold, flood and drought it has no equal. In appearance the Minnesota King is practically distinct, being a half yellow dent, the kernels are very broad and of an extremely rich golden color. The ears are good size, eight rowed, cob small. Large pkt., 10 cts.; lb., 25 cts.; 3 lbs., 60 cts.; postpaid. By express or freight, peck, 50 cts.; bushel, $1.75; 2 bushels, $3.00; 10 bushels, $13.50; bags included.

NOTE.—This corn was introduced by us several years ago, and although each season we have anticipated the large sale which it has met by the liberal provisions, we have never as yet been able to supply the demand, having returned money yearly to late purchasers.
Our Mercer Corn, which we introduced 10 years ago, has from that time to the present sustained the reputation of being, wherever grown, the earliest and most productive of all the tall growing Yellow Flint varieties, and has given such perfect satisfaction to our customers, that our announcement of a new corn of the same type, that is not only earlier, but that bears ears averaging 13 to 15 inches in length, and that is very much more productive, will be hailed with surprise as well as satisfaction by those who know how good a corn the Mercer is.

Description of . . . Triumph Corn.

Our TRIUMPH CORN is a very early flint variety, very bright yellow in color, maturing in from 80 to 90 days from day of planting, according to soil and season. Ears average about 13 inches in length (about 5 inches longer than the Mercer) and are 14 to 16 rowed. Occasionally a 12 rowed ear is found; sometimes one with 20 rows. The kernels are large (nearly double the size of the Mercer) and the stalks of good height. The ears average two to a stalk, growing well up so as to readily admit of being cut by the harvester. The stalks make superior fodder.

Directions for Planting—The habit of the corn allows of close planting. The largest crop of both corn and fodder will be secured by planting in rows, dropping the kernels one at a time one foot apart. If it is desired to cultivate both ways plant in hills about 3 ft. 8 in. apart, but do not put more than two or three kernels in a hill.

PRICES: Large Packet 15c; lb. 30c postpaid. By express or freight peck $1.00; bush. $3.00; 2 bushels $5.50; 10 bushels $25.00. Bags free.

Every variety of Early Corn that has become standard in the Northwest, has been of our introduction.
Early varieties of Seed Corn, particularly the "flint" sorts, are scarce this year. Purchasers will do well to secure their seed early. They will also do well to remember that an expenditure of a few cents extra to the acre for seed may mean a good many dollars in the harvest, and perhaps the saving of the entire crop.

"A NORTH DAKOTA EXPERIENCE."

NORTHUP, KING & CO., Minneapolis, Minn.

GENTLEMEN: In reply to yours, July 29th, as to the satisfaction given by seeds bought of you last spring, I take great pleasure in reporting entire satisfaction.

Of the 66 bushels of seed corn, mostly Minnesota King, bought of you for and planted by myself and neighbors, I have not heard a single complaint. This corn was ordered in several different lots at different times. I have talked with those who planted the greater part of it and all agree that it is the finest corn they have ever planted, ranging cylindrical, about in length being highly productive by corn planters, owing to the great and unusual trouble with seed corn throughout the Northwest, and your seed stood the test here in the cold Red River Valley of the North, and when that is said nothing further need be said in its favor.

The 4 lbs. each of 4 varieties of garden peas were very fine. Could not be more perfect in every way. I was equally well pleased with all of the other garden seeds received from you.

Yours truly,
L. W. Scott.

Squaw. (Very short crop this year.) Extremely early and of very dwarf habit. We still grow this corn for those who want it, but we urge the planting of our North Dakota White Flint or North Dakota Yellow Flint in its place, as both of these varieties are fully as early, large, productive, and make a much more vigorous growth. Large pkt., 10c; lb., 20c, postpaid. Peck, 75c; bu., $2.50. Bags included.

North Dakota White Flint. Resulting from a careful selection of the Squaw corn for many years. Very much better than the Squaw. Large pkt., 10c; lb., 20c, postpaid. Peck, 75c; bu., $2.50. Bags included.

North Dakota Yellow Flint. (Gehu.) Resembles closely the White Flint in earliness, habit of growth, &c., but the grain is yellow. Large pkt., 10c; lb., 20c, postpaid. Peck, 75c; bu., $2.50. Bags included.

N. K. & Co.'s Mercer. (Yellow Flint.) Early and of large ear and small cob. Has been grown in Northern Minnesota and North Dakota for the past six years with great success and complete satisfaction. Very prolific, having yielded 46 lbs. bushels of good, sound ears to the acre, in a full Yesco variety, from 9 to 11 bu. in a single cob, starting out to the tips; a rich golden yellow color; has matured in 75 days from time of planting. Many stalks have two and some three ears. Stalks average about 6 feet in height, and make excellent fodder. Very few suckers. Large pkt., 10c; lb., 20c, postpaid. Peck, 50c; bu., $1.75; 2 bu., $3.00; 10 bu., $14.00. Bags included.

Longfellow. (Yellow Flint.) A very early 8-rowed corn of the early type; ears cylindrical, about in length being of very glossy. The weight of seed corn is fully 60 lbs. Large pkt., 10c; lb., 20c, postpaid. By express or freight, peck, 50c; bu., $1.50; 2 bu., $2.75; 20 bu., $13.00. Bags included.

N. K. & Co.'s Minnesota White Flint. Early. An 8 to 10-rowed white flint corn; long, well shaped ears; small cob. Stalks bear from 2 to 3 ears, small kernels, hard and compactly placed on cob. Large pkt., 10c; lb., 20c, postpaid. By express or freight, peck, 50c; bu., $2.00; 2 bu., $3.30. Bags included.

N. K. & Co.'s Dakota Dent, (Earliest full Yellow Dent.) Thousands of bushels sold since introduced. It grows to 6 to 8 feet in height; cob small, well filled out to the end with long, deep grains. Large pkt., 10c; lb., 20c, postpaid. Peck, 50c; bu., $1.75; 2 bu., $3.00; 10 bu., $13.00. Bags included.

Rustler. Early White Dent. Obtained from a few kernels sent us in the autumn of 1881 by a Dakota farmer, who had that he had matured it in that State for 7 successive years; that it was the only corn in his section which could show such a record. For early ripening, for long, yield, compact growth, of ears it is one of the best; admirably adapted to a Northern climate. Those wishing a first-class White Dent corn will find in the Rustler a hard corn to match. Large pkt., 10c; lb., 20c, postpaid. By express or freight, peck, 50c; bu., $1.50; 2 bu., $2.75; 10 bu., $12.00. Bags included.

Pride of the North. Early Yellow Dent. We consider our Dakota Dent a marked improvement over Pride of the North for early dates, a better yielder. Those wishing the pride of the North, however, will find our stock especially desirable. Large pkt., 10c; lb., 20c, postpaid. By express or freight, peck, 40c; bu., $1.00. Bags included.

Huron. Early Yellow Dent. Fine strain of early corn. Grain deep golden yellow, and large, while cob is very small. 70 lbs. of our stock made 46 lbs. of shelled corn, leaving only 6% lbs. of cobs. Large pkt., 10c; lb., 20c, postpaid. By express or freight peck, 50c; bu., $1.40; 2 bu., $2.50; 10 bu., $10.00. Bags included.

Small Nose Flint. A yellow flint corn blazed with red at end of ear. Ears are large and round. This is a very early variety, and a great favorite in many localities. Our stock is very fine. Large pkt., 10c; lb., 20c, postpaid. Peck, 50c; bu., $1.75; 2 bu., $3.00. Bags included.

University Number Thirteen. Prof. Hays, the widely known agriculturist of the Minnesota State Experiment Station, has for some years past been conducting a series of experiments with many kinds of corn, having particularly in view the selection of an early variety that would save larger yields than other varieties. The University Number Thirteen was the variety finally selected for dissemination. Prof. Hays does not claim any farfetched qualities for University Number Thirteen. Indeed it is not a prolific sort, but it is highly productive, in appearance, as that would have interfered, somewhat, with the selection for large yields and profits. The experience of the two years following the introduction of this corn has fully demonstrated its ability as a producer. It is a full Yellow Dent 16-rowed variety, kernels borne on the cob without any early date of our Dakota Dent (which is of much the same type), but highly recommended for planting south of St. Cloud, Minn. Large pkt., 10c; lb., 20c, postpaid. Peck, 50c; bu., $1.50; 2 bu., $2.50; 10 bu., $10.00.

Try our TRIUMPH FLINT CORN. (See page 11.) A true 80 Day Corn.
**IMPROVED MASTODON CORN.**

In the celebrated American Agriculturist Corn Contest, Mastodon Corn outyielded by far every other variety of Yellow Corn. Alfred Rose of Yates County, N. Y., raised on one acre 18, 505 POINTS PAST THE FODDER CORN which made 213 BUSHELS OF SHELLED CORN. The originator states: "The Early Mastodon corn, named Mastodon because of its large ears, has been brought to its present standard by careful selection. The seed trade and large growers of field corn have for many years been anxiously interested in a large-fruited, early Dent Corn, and to supply their wants I have for years been studying it up, and when I got up this corn it was not fully satisfied. Many sorts have been tried and found wanting. In the Mastodon your customers will find a high-bred corn, which I will please them. $3.25 per bu., @ postpaid. For a large number of rows on cob, and the deepest, longest grains of any corn ever originated. It grows very rapid, strong and rank, and in medium height will out-yield any corn ever grown in this section. You cannot too highly recommend this corn to your customers. I have grown thousand bushels of Mastodon Corn, and the Mastodon is from three weeks to one month earlier, growing side by side and planted the same week; and again Mastodon Corn is from one week to ten days earlier than any Landscape Corn grown. Price for Mastodon Corn: Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 50c, bu., $1.25; 2 bu., $2.00; 10 bu., $8.50. Bags included.

**NOTE.** While Mastodon Corn has thoroughly established itself as the earliest of the large oared varieties, and is early as compared with Golden Beauty, Laming, and other standard late sorts, we do not as yet recommend it for general planting north of latitude 45. We have tried to run from one to three miles of Mastodon Corn on a small farm, and hope in two years more to be able to recommend it for general planting as far north as latitude 45. Meanwhile, we hope as many as possible of our customers in the north, will try a small quantity and report their success.

**IOWA GOLD MINE CORN.**

This is a fine new variety. It is early, ripening only a few days later than the Pride of the North; ears are of good size and symmetrical; color a bright golden yellow, as handsome as a twenty dollar gold coin, just from the mint; grain is very deep, cob small; and therefore dries out very quickly as soon as ripe. Price, lb., 20c, postpaid; by freight or express, peck, 40c; bu., 1.25; 2 bu., $2.00; 10 bu., $8.00. Bags included.

**STANDARD LATE VARIETIES.**

Golden Beauty (Yellow Dent). The largest Grain and handsomest yellow dent corn in cultivation; the ears are large, of perfect shape, and in every way present as perfect a type as could be desired; has from ten to fourteen rows, and fills out well to the end of the cob; grows eight to ten feet high. Not recommended for the Northwest, but for the Middle and Southwestern states. Shipped on receipt of order with freight included. Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 40c; bu., $1.00; 2 bu., $1.75; 10 bu., $7.50. Bags included.

Improved Leaming (Yellow dent). Ears of good size, cob red and small, with a deep large grain of bright yellow. It is a strong grower and produces well on light, heavy land with little care. It will not thrive. Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 40c; bu., $1.00; 2 bu., $1.75; 10 bu., $7.50. Bags included.

Champion Pearl (White dent). A pure white dent corn, exceedingly heavy, very compact, very prolific; will grade No. 1 White in any market; can be planted thicker than large corn and bear full sized ears; it stands storms and drouths well. Large Pkt., 10c; lb., 20c, postpaid; by express or freight, peck, 40c; bu., $1.00; 2 bu., $1.75; 10 bu., @ 75c. Bags included.

**FODDER CORN.**

**STOCKFEED, DAIRYFEED and others using FODDER CORN should place their orders EARLY, so that they can secure it at the low prices, test it and have corn on hand that they KNOW WILL GROW when ready to plant.**

The CLOSER IT IS PLANTED THE FINEST THE FODDER CORN will stand to the acre; this, in our judgment, is too much, as by such dense growth it is deprived of sun and air. Such fodder, if fed before drying is water- tory and sandy, and when dry is light and chaffy, in neither case containing much nutrient.

N. K. & Co. Giant Fodder. In proportion to the quantity this variety has a smaller stalk than any other fodder corn known to us. In growth it is very tall and leafy, and yields an immense quantity of fodder of excellent quality. The B.W., S. 60, and other well known varieties of fodder corn grow just as tall and often taller than this variety, but the ears, leaves that are just as large, but the extraordinary productiveness of the Giant Fodder corn arises from the closeness of the joints, and as leaves are thrown out at every joint, the result is an immense yield of fodder over every other variety with which we are acquainted. Lb., 20c, postpaid; by express or freight, lb., 10c; peck, 30c; bu., 45c; 2 bu., 1.60; 10 bu., @ 75c. Bags included.

Red Cob Fodder. In habit of growth it is very similar to the Giant. It has been before the public for some years and undoubtedly meets with the largest sale of any fodder corn. Lb., 20c, postpaid; by express or freight, lb., 10c; peck, 30c; bu., 50c; 2 bu., $1.50; 10 bu., @ 75c. Bags included.

Elephant Fodder Corn. This is a yellow seeded, large growing leafy southern variety, selected solely with a view of producing the largest yield of fodder at the lowest possible cost. We have grown this in large quantities and the very low price and splendid quality should cause it to sell quickly. Price, bu., 60c; 2 bu., $1.10; 10 bu., @ 50c. Bags included.

Evergreen Sweet Fodder Corn. It is an undeniable fact that there is better feeding quality in one ton of Evergreen Sweet Corn than in a much larger quantity of any other variety. The reason is evident from the fact that all sweet corn possesses very much more sugar than the field sorts, and as sugar is the most important constituent, it necessarily follows that the corn possessing the greatest quantity of sugar is most valuable. It does not, however, yield as largely as the above named sorts. Lb., 20c, postpaid; by express or freight, lb., 10c; peck, 50c; bu., $1.75; 2 bu., $3.00; 10 bu., @ $1.50. Bags included.

**POP CORN.**

Large Pkt., Qt. postpaid. By exp. or freight, Qt. Early Red Jacket. The best Red variety of Rice Pop Corn...... 5c 35c ** " " ** Queen Golden. Pops perfectly white. Productive........................ 35c 35c ** " " ** White Rice. ......................................................... 35c 35c ** " " **

Early
DWARF ESSEX RAPE.

We were the first Seed House in America to bring Dwarf Essex Rape prominently forward as a desirable and economical Pasturage for Sheep.

Following Professor Shaw’s first bulletin on the subject written while he was connected with the Canadian Department of Agriculture at Guelph, Ont., we arranged for a quantity of the seed of the True Dwarf Essex Rape with a grower of Essex County, England. Every year since then we have had our seed from the same source. We pay a good price for it. We can buy it for a good deal less elsewhere, but we have always given satisfaction and have stood the test. For this reason we are not able to make always as low a price on Dwarf Essex Rape as some of our competitors, but while many other houses have had trouble with their Rape Seed, ours has always been satisfactory and proven true to name. We are led to make this statement from the fact that many in seeing or sending for our price cannot understand why our prices, so low on most everything, are sometimes higher on Dwarf Essex Rape. A few cents extra per acre may make a GOOD MANY DOLLARS DIFFERENCE IN THE CROP.

DWARF ESSEX RAPE is an annual, bearing a close resemblance in leaf and stalk to the rutabaga, but both leaves and stalk are much more numerous in the Rape plant, and of a taller habit of growth. It is a pasture plant which may be eaten off by any kind of live stock, but it is preeminently fitted to furnish pasture for sheep and swine. A good crop will furnish pasture for at least 12 tons of green food per acre and its nutritive value is nearly twice that of clover. One acre of well grown Essex Rape will furnish pasture for ten to twenty head of sheep for two months, and in that time it will fatten them in good form for the market. Dwarf Essex Rape thrives best on a good soil, rich in vegetable matter. Slothy lands are excellent.

This plant may be grown successfully in the following ways, viz: 1. In the early spring to provide pasture for sheep and swine. 2. In June or July on well prepared land to provide pasture for sheep. 3. After harvest of grain, using 2 lbs. of seed per acre to provide pasture for sheep after harvest. 4. Along with peas, oats, or clover seed, to provide pasture for sheep, and to get a “catch” of clover. 5. Along with corn drilled in broadcast to provide pasture for sheep. 6. In corn, sowing the seed with the last cultivation given to the corn. 7. Along with yee sown in August in pasture pasture, Essex rape is sown broadcast, 5 lbs. of seed per acre will suffice. When sown in rows, say,

DWARF ESSEX RAPE."—Do They Like it?"
From a Photograph taken at the Minnesota State Farm.

Sorghum.

EARLY MINNESOTA SUGAR CANE. A much Neglected, a Highly Valuable Plant. Notwithstanding its great adaptability as a food for live stock, it is only quite recently that the real value of Sorghum (or sugar cane) has attracted general attention. In the Northwest, its great merit is not at all appreciated, and we think it is time to call the attention of farmers everywhere to the great value of Sorghum as a pasture and fodder crop, and to the particular advantage to be gained in using our Seed. Minnesota grown Seed in place of any other kind. Sorghum may be made to furnish the principal provender for Cattle, Horses and Mules from August until the following spring. As a summer pasture for Sheen, a wide field is likely to be kept out of the stock and up for it. As a soiling food for Swine it is most excellent, and the seed furnishes a splendid food for fowls. It can be profitably grown everywhere, from the extreme north to the extreme south, and on any ground adapted to the growth of or at least grows right along through the severest and most prolonged droughts, so that a good yield may be expected from suitable soils in any seasons after the plants have a secured a good start.

As PASTURE, it is grown with excellent results, and springs up quickly after being fed or cut. Care, however, should be exercised in feeding it green, for while some growers state that no ill results follow its free use others claim that, like clover, it will produce bloating.

As FODDER. It beats everything. One correspondent writes us: “For winter feed, the most economical thing we know of. We have taken off 37 full loads (about 50 tons) of half-cured fodder to the acre.” When fed as a whole ration it has a tendency to whiten the milk, but not the butter, as does Corn. About thirty pounds of seed is required to the acre. Use a wheat drill set to one bushel. Stop every other hole. When the plants are about 8 inches high, harrow with a disc or with a narrow moldboard plow.

For soiling, it may be cut as needed. For fodder, cut soon after the boom comes out on the heads, leave for two or three days on the ground, then put up in shocks of about one load each.

THE SEED. No other variety can, in our estimation, compare with our Improved Early Minnesota, either for sugar or fodder purposes. It is unusually rich in saccharine matter, in vigor and much earlier than any other variety. Price, 1 lb., 25¢; postpaid, by express or freight, 1 lb., 15¢; 10 lbs., @ 10¢; 100 lbs., @ 6¢; bags included.

SOUTHERN Grown CANE. The seed is from two to three weeks earlier than Southern Cane. Where Early Maturing Cane is not particularly desired, Southern Seed may be satisfactorily used. This we offer as follows: Amber Cane (Southern Grown), 1 lb., 15¢; 10 lbs., @ 4¢; 100 lbs., @ 3¢; 500 lbs., @ 25¢; bags included.

Early Minnesota
Amber Cane.

Northrup, King & Co., Seed Growers, Minneapolis, Minn.
FIELD PEAS.

Prices Subject to Market Fluctuations.

PEAS are a paying crop in many ways. First, They CAN BE GROWN ANYWHERE IN MOST ANY CLIMATE AND ON NEARLY ANY SOIL. Second, They are a PROFITABLE CROP to grow, in that the peas when threshed are as STAPLE GRAIN AND CAN always be marketed. Third: They stand in the FRONT RANK as a FOODBINDER PLANT, being very rich in the elements that improve the muscle, bone and nerve system. Fourth: As much of the crop as may be desired can be fed green, the balance may be used as dry feed, or the peas can be threshed and sold; last, but not least, perhaps, more IMPORTANT STILL, AS A RENOVATOR OF THE SOIL. THEY RANK NEXT TO CLOVER, and can be readily grown where clover will not thrive. Their MANUAL VALUE is a point that should not be lost sight of, particularly by those who have grown peas for years and upon ground no longer producing large crops. The reason is plain. The nitrogen is exhausted from the soil. Peas are great absorbers of nitrogen from the atmosphere and land upon which they are allowed to grow, and the crop plowed under will, the next year, supply the great benefit; even if the land is not harvested and the stubble only turned under, the improvement will be marked. Farmers throughout the Northwest who have neglected to try this fine and productive crop should particularly give it attention. FIELD PEAS can be sown alone or with Oats. If alone, about 3 bushels are required to the acre. If with Oats, 1½ bushels of Peas and 2 bushels of Oats. The latter is a fast growing, profitable method, and one that we strongly endorse, as in this way a double crop can be secured. They can be threshed at one time, and the husks separated in cleaning. Do not sow Peas on too rich ground, as they will run to vine instead of pod. We are HEAD QUARTERS in the Northwest for Chancellors Field Peas. Yellow. Height of vine 3½ to 4 ft. We wish to call especial attention to this Pea as being superior to any other field variety. It is free from the alkali, a very important consideration, not only with peas, but with other farm crops, providing that the yield of the early sort chosen is as great as the late, for it is a self evident fact that the risk of crop failure is increased by as much as the growing season can be reduced. The pea in question is not earlier, but, we believe, more productive than any other sort. Qt., 30c, postpaid. By express or freight, qt., 30c; peck, 50c; bu., $1.50; 2 bu. at $1.35; 10 bu. at $1.25. Bags included.

Canada Field Peas, Yellow. Height of vine 3½ to 4 ft. This is a standard sort of Green Field Peas and needs no special description. This variety is extensively grown in Canada, Wisconsin and other pea growing sections, and has a large sale, not only for agricultural purposes, but for use in soups. Qt., 30c, postpaid. By express or freight, qt., 15c; peck, 40c; bu., $1.20. Double, 15 bu. at $1.15. Bags free.

Canada Field Peas, Green. Height of vine 3½ to 4 ft. Of the same general character as Canada White Field Pea. Used for the same purposes, but the seed is green in color instead of white. Qt., 30c, postpaid. By express or freight, qt., 15c; peck, 50c; bu., $1.50; 2 bu. at $1.35; 10 bu. at $1.25. Bags free.

Scotch Peas. Mottled green. Seed is larger than the ordinary green field pea. Vines are also of more vigorous growth. Very productive. Qt., 35c, postpaid. By express or freight, qt., 20c; peck, 50c; bu., $2.00; 2 bu. at $1.80; 10 bu. at $1.60. Bags free.

Large White Marrowfat. Seeds white, Height 4 to 4½ ft. Tall, robust variety; large, plump, fine quality. Qt., 35c, postpaid. By express or freight, qt., 15c; peck, 60c; bu., $2.20; 10 bu. at $1.60. Bags free.

Black Eye Marrowfat. Height 4 to 4½ ft. Seeds white, with black eye; very hardy. Qt., 30c, postpaid. By express or freight, qt., 20c; peck, 50c; bu., $2.00; 2 bu. at $1.80; 10 bu. at $1.60. Bags free.

Sand or Winter Vetch (Vicia Villosa). Sometimes called the Hairy Vetch. This has proven to be the most valuable of all the Vetches, but it succeeds well nearly all soils, and thrives surprisingly on poor light land, and will withstand extremes of drought, heat and cold. It may be sown either in the fall or in the spring, with or without Vyne. It grows rapidly and is particularly valuable in sections where clover does not thrive. In the North it remains green all winter under the snow, and is invaluable for early pasturing or sowing. It is valuable as a fertilizer being a great nitrogen gatherer, for hay, and can be sown in succession to crops commencing to pod. Fifty pounds of seed required to the acre. Large pkt., 5c; lb., 15c, postpaid. By freight, lb., 10c; 10 lbs. at 5c; 50 lbs. at 7c; 100 lbs. at 6c. Sands free.

Spring Vetches. Used for the same purposes as the Sand Vetch, but will not thrive on as poor soil, or withstand extremes of weather as successfully. Large pkt., 5c; lb., 15c, postpaid. By freight, lb., 10c; 10 lbs. at 7c; 50 lbs. at 6c; 100 lbs. at 5c. Bags free.

Kidney Vetch or Sand Clover. Perennial. Valuable for dry sands and poor soil. Sow 20 lbs. of seed to the acre. Pkt., 5c; lb., 25c, postpaid; 100 lbs. at 10c. Sands free.
AUSTRALIAN SALT BUSH. The many thousands of acres of alkali lands of the West may be made productive and profitable by planting Salt Bush. Cattle, Horses, Sheep and Swine eat it and thrive on it. This plant is not an experiment, it is a demonstrated fact in Australia. Evergreen, it produces a fine hay in California, and already has proven a boon to stock raisers on the California ranges. It flourishes where grasses and other forage plants will not grow, and furnishes enormous quantities of nutritious food for stock and remains green all winter. Single plants grown on the worst alkali lands have reached a diameter of 16 feet in one season. It succeeds everywhere, and there seems to be no question but that it will in time eliminate alkali from the ground, rendering it suitable for other crops. Prof. Tower states that its nutritional strength is nearly equal to that of Alfalfa. Large pkt., 10c; lb., $1.50.

Test AUSTRALIAN SALT BUSH This Season. One pound of seed will plant an acre. Sow after the ground has become warm and all danger of frost is past. Mix the seed with ten times its bulk of loam, sand or land planter, and sow broadcast, after which cover lightly with a brush harrow or roll lightly. The seed germinates quickly, and the plants will soon take possession of the ground. Or the seed may be sown in a hot-bed, cold-frame, seed-boxes, or in a protected garden-bed, and the seedlings transplanted when two inches high, 7 to 8 feet apart. If the weather is dry when planting, supply a little water to each plant. Large package, 10c; ½ pound, 90c; 1 pound, $1.75, by mail postpaid. Deduct 10c a pound if wanted by express or freight.

Although our own test showed a good growth, we had nine complaints from customers to whom we sold Australian Salt Bush. We referred it not to the seed, but to the complaints to the collectors who furnished the seed, and he states that without the fault lay in covering the seed too deeply. He writes, "Advise your customers to prepare the ground thoroughly and cover the seed very lightly, and you may also say to them that Australian Salt Bush is a splendid and unqualified success."

TEOSINTE. A valuable fodder plant, resembling Indian Corn in growth.................................................................10 4.50

WILD RICE. Valuable as an attraction for water fowl. Directions for sowing sent with each order..................................................10 20 12.00

THOUSAND HEADED KALE. We wish to call attention to Thousand Headed Kale as a valuable pasturage for sheep. The plant grows up to 6 feet tall in several weeks, and yields an enormous crop of wholesome and nutritious food. It produces more food to the acre than any other, and sheep especially thrive wonderfully upon it. So far as we know, it has not been used in this country, but we do not hesitate to predict that in a few years it will be as popular as Dwarf Essex Rape. It is in England thoroughly established and safe and profitable pasturage for sheep. The seed should be drilled in rows 20 to 30 inches apart, and plants thinned out so as to stand about 20 inches apart in the row, or the seed may be broadcasted, using 1½ lbs. to the acre. Large pkt., 10c; ½ lb., 30c; 1 lb., $1.00, postpaid.

Northrup, King & Co., Seed Growers, Minneapolis, Minn.
GRASS AND CLOVER SEEDS.

QUALITY.

We ask special consideration of the QUALITY of our Grass, Clover and Millet Seed. It may not be generally known that Northern Minnesota and Wisconsin grown Timothy and Clover Seed ranks the highest of any produced in the United States, and commands the highest price in the markets of this country and Europe. We have the best cleaning machinery obtainable, and exercise every care to assure a high degree of purity and germination. Any one who orders our best grades of Grass, Clover and Millet Seeds, may exercise the privilege of returning them at our expense if upon arrival and prompt test they do not develop a high percentage of growth, or fail to prove of satisfactory purity under microscopic examination.

OUR "STERLING" BRANDS.

The terms FANCY, CHOICE and PRIME by which the best grades of Timothy and Clover Seeds are usually known, vary greatly in different markets, and have become much abused by many seedsmen, who apply these terms indiscriminately to any grade of seed. For this reason we have established a grade of our own called STERLING, and we intend this grade to represent the best seeds possible to send out, both as respects PURITY and GERMINATING POWER. We shall continue to sell Choice and Prime Graines, and they will be found exactly as represented, but the cost of using the best seed is so little more, that we urge purchasers to buy our STERLING BRANDS, and secure the best quality. The results will pay the difference many times over.

PRICES.

Prices on Grass Seeds, Clovers, etc., are very fluctuating. Those herein given are based on values the day this is written. We reserve the right to send seed to the value of the money sent us, according as the market is higher or lower. If large quantities are wanted, it is always best to write for prices. Then there is sure to be no misunderstanding. Unless otherwise stated, our prices include Sacks and free delivery to any railroad station in Minneapolis.

Many Grass or Clover Seeds are wanted by mail, add 10c per pound for postage.

Please note that we quote both by the 100 LBS. and BUSHEL.

In ordering, always state Grade wanted. 20 lbs., or more, supplied at the 100 lbs. rate.

"All the Seeds I had from you have given entire satisfaction, especially the GRASS SEEDS, which are the CLEANEST and BRIGHTEST I have ever seen."

CHAS. WELCOME, Pratt, Wis.

MR. O. C. GREGG.
Superintendent of Minnesota State Farmers'
Loyd, Lyon Co., Minn., Dec. 6, 1907.

NORTHUP, KING & CO.,
Minneapolis, Minn.

GENTLEMEN:—We purchased of you last spring some of your Grass Seeds, sold under the "Sterling brand." We made selections of them because we were assured that they were free from foul seeds, and had strong germinating power. Our experience with them verified the recommendation you gave. One of the dangers which grows out of the sowing of grass seed is that we are liable to get injurious weed seeds in such sowing. We had an experience with some in which we obtained the seed of the ox-curbed daisy, and had to watch very closely in order to exterminate the little thing which we then gave to that pest upon our place. The Seedsman who will furnish seeds of good vitality, as well as free from noxious weeds, is a valuable aid to good agriculture. We believe that your house proposes to maintain and further establish that reputation for HIGH GRADE SEEDS that is needed in our Northwest. I am, very truly yours,

O. C. GREGG.
CLOVERS.

Mr. J. E. Story.

Mr. Story has a great record as a farmer. As a young man, he won the Gold Medal, awarded by the Counties of Lanark and Carlton, for the best farm in these Counties. He was then made Superintendent of the Government Experiment Station at Ontario, Canada; from there, went as manager of the celebrated "How Park" farm, the "crack" farm of Canada, which position he held until he came to Minnesota and took charge of Mr. J. J. Hill's farm at White Bear Lake.

IMPORTED AND FANCY GRASSES.

If wanted by mail add ten cents a pound for postage. Ten pounds or more supplied at the 100 lb. rate.

AUSTRIAN BROME GRASS.—(Bromus Inermus.)

This is the most promising grass that has yet been tried on the prairies of the West. It is very hardy, endures very low temperature in winter, and possesses great power to grow in dry climates. It is well adapted for hay or pasture. This grass comes up quickly in the Spring, makes a rapid growth, and after it has been cut for hay, makes abundant pasturage.

Prof. Shaw says: "This grass cannot be obtained too soon by the farmers of the Northwest."

We wish to call special attention to the quality of our seed. The large demand for this seed has resulted in a great deal of trashy, light seed being sold.

We offer two grades of this seed, "Sterling" and Regular. Our "Sterling" grade is the finest obtainable, the best and heaviest we have ever seen. By mail, postpaid, lb. 35c. By express or freight, lb., 25c; 100 lbs., $20.00. 15 lbs. to the acre.

Regular. Is good seed but lighter, and does not show as good a test. It is fully equal, however, to the seed usually sold. By mail, postpaid, 30c. By express or freight, lb., 20c; 100 lbs., $16.00. 20 lbs. to one acre.

CAUTION. Last season, owing to the great demand for Bromus Inermus, which early exhausted the supply of good seed obtainable in this country or Europe, several unprincipled seedsmen sent out Bromus Molis, the seed of which resembles that of Bromus Inermus, but which is in growth and value but little better than a weed.

Our REGULAR grade of Bromus Inermus above quoted is in every particular equal to any we have seen sent out by other seedsmen, but our STERLING grade we unhesitatingly pronounce the finest, heaviest and purest Bromus Inermus obtainable anywhere, COMPARE SAMPLES.
The permanent pasture mixtures you made up last spring for forty acres of our Beaville County farm made an excellent catch and is very thick on the ground. Although the original cost is greater, I believe that such mixtures as these are, in the long run, VERY MUCH MORE ECONOMICAL and PROFITABLE than the VARIETIES ORDINARILY USED FOR PASTURES in the Northwest. Yours truly,

H. POEBLER COMPANY.

The permanent pasture mixture you made up for Mr. Peavoy’s Highcroft Farm has done splendidly. It was a fine mixture and made a good catch.

MR. J. STRUDWICK,
Supt. Mr. F. H. Peavoy’s Highcroft Farm.

N., K. & CO.’S CLOVER GRASS MIXTURES.—We ask purchasers to observe that we are able to offer, at these very low figures, only from the fact that we make up large quantities before the commencement of the season, therefore nothing can be taken out. We cannot afford to add anything to the mixture, on account of the slight margin upon which we have figured. We shall be happy, however, to make estimates on any special mixtures desired by our patrons. Our recommendations for quantities of the acre is fixed on the basis of good fair seeding. The quantity can, of course, be spread over more or less ground, as the case may demand. 37 25 lbs. supplied at the $0.50

FOR PERMANENT MEADOWS.

Lbs. per acre. Per lb. Per 100 lbs.

No. 1. For dry and high grounds, light soils
No. 2. For dry and high grounds, strong soils
No. 3. For moist grounds and rich soils
No. 4. For orchards and shaded places
No. 10. For high and dry grounds, light soils
No. 11. For high and dry grounds, heavy or clay soils
No. 13. For moist grounds and rich soils
No. 14. For orchards and shaded places

FOR PERMANENT PASTURES.

Lbs. per acre. Per lb. Per 100 lbs.

No. 15. For top seeding to improve the ground pastures
No. 16. For orchards and shaded places

The above are mixtures we can “stand by.” We can make up lower priced mixtures if desired. Don’t let the price stand in the way of your getting a good article. It is the cheap, fake grass mixtures that have brought discredit on grass and clover mixtures in this country.

PRICES SUBJECT TO MARKET CHANGES.

Lb., 20c; postpaid; peck, 35c; bu., $1.00; 10 bu. at 90c

N. K. & CO.’S GOLDEN WONDER MILLET. Heads eighteen inches in length containing 15,000 seeds are not rare. The average length of head is about fifteen inches. The yield is enormous. The stalk at butt measures about one-fourth of an inch, full of broad leaves, resembling those of corn, and usually weighing 10 to 12 tons of fodder per acre, and as easily cured as clover hay.

Lb., 20c, postpaid; peck, 75c; bu., $2.00

GERMAN MILLET. Those who grow Millet for hay will find the Southern grown German Millet the best variety for that purpose on account of its giving a ranker yet finer growth than the Northern grown Millets. Peck, 35c; bu., $1; 10 bu. @ 90c

COMMON MILLET. Requires a dry, light, rich soil, and grows 2 to 4 feet high, with a fine bulk of stalks and leaves, and excellent for forage and grain. For hay, sow broadcast, one-half bushel per acre, from May 1st to Aug. 1st. For grain, sow in drills, one peck to the acre and not later than June 10th. Peck, 30c; bu., $1.00; 10 bu. @ 90c

HUNGARIAN. A dark seeded variety, resembling in growth the German Millet, but being less rank, and possessing finer stalks. Peck, 35c; bu., $1.00; 10 bu. @ 90c
Vegetable Seeds.
EVERY VARIETY WE LIST IS GOOD.

In making up our list of Vegetables it is our aim to include those only which possess the best MERIT, and to describe and illustrate them fully.

Attention, too, is called to the fact that in leading sorts we mention the number of seeds to be found in our packets.

Bear in mind, please, that our Seeds are TESTED.

Remember that our PINT and QUART prices on PEAS, BEANS and CORN include payment of postage by us.

If wanted by express or freight with other seeds, postage may be deducted.

ARTICHOKE SEED. (For Roots see page 25.) Large Pkt. Oa. 1/4 lb. Lb.

Green Globe. Grown for the unripe flower heads, which are highly esteemed by epicures. 8c 30c 80c $3.00

ASPARAGUS SEED. (For Asparagus Roots see page 25.) Columbian Mammoth White. Gives immense yield of clear white shoots. A most distinct and valuable variety. 5 10 30 1.00

The shoots remain white, without etching or artificial blanching, as long as fit for use, and it can be depended upon to give 80 to 90 per cent. of white plants from seed. 5 10 15 .50

Palmetto. Mauring in size, and having a clear and abundant appearance. Usually ready for market before other varieties. 5 10 15 .50

Conover's Colonial. Produces extra large, quality first-class, spreads less and other sorts. 45 10.00

Barr's Mammoth. Produces very large shoots and very excellent quality. 5 10 15 .50

BRUCOLI. White Cape. We consider this the best variety for color creamy white. Can be grown in the home garden. 5 40 1.00

Purple Cape. Best variety for the North, being earlier than the white. 5 30 80)

BRUSSEL SPROUTS. Improved Dwarf. Produces on the stem small heads resembling miniature Cabbages. The sprouts are used as greens, and are excellent when toughened by frost. 5 15 50

BEANS, DWARF, STRINGLESS, WAX PODDED.

Our packets of Beans contain on an average about 100 Seeds. Large Pkt. Qt. Bu.

Black Wax Improved Prolific. Very early. Pods round, full, stringless, fine quality. 5c 40c $4.00

Black Wax. Challenge. Extra strain of Dwarf Black Wax. 5 40 4.00

Black Wax. Curries Rust Proof. Flat Pods. Very early and productive. 5 40 4.00

Black Eye Wax. Very early. Production. 5 40 4.00

Burpee's New Stringless, Green Pod (New). The only stringless Green Pod in cultivation. Earlier than the Red Valentine or Yellow Six weeks. 5 50 5.00

Crystal Wax. Early, round, translucent pod. 5 50 5.00

Davis White Wax. (New.) An entirely distinct sort. Seed is entirely white, without eye. Pods flat, long, white, straight and handsome. Very hardy and productive. Valuable for market gardens and Canners' use. 5 45 5.00

Detroit Wax and Improved Golden Wax, and Less Stringless Wax. 5 50 5.00

Flagellet Red Wax. Pods flat, yellow, stringless, long and broad. 5 50 5.00

Golden Eye Wax. Very early. Free from rust. Pods yellow, flat. 5 40 4.00

Golden Wax. (Improved.) Early flat, yellow pod. Popular sort. 5 35 5.50

Keeney's Rustless Golden Wax. Pods yellow, meaty, and entirely stringless. 5 40 4.00

Perfection Wax. Yellow, flat, stringless pods, early and more productive than Golden Wax. 5 40 4.00

Pods Eye Wax. Early. Resembles Detroit Wax. 5 40 4.00

Redeye Wax. Very productive; early. For early or late sowing. 5 40 4.00

Saddle Back Wax. Pods very large, round, and very solid. 5 55 5.50

Valentine Wax. Remarkably early. Pods are thick and fleshy with but little string. 5 40 3.50

Wardwell's Kidney Wax. Pure Wax Pods, long, flat, and not likely to rust. 5 45 5.00

Yosemite Mammoth Wax. A giant among beans. The pods frequently reach a length of 10 inches. They are of a rich golden color, tender and delicious when cooked. 5 45 6.00

BEANS, DWARF OR SNAP, GREEN POD.

Best of All. Early and of superior quality. Pods, which are splashed with red, are round and fleshy. 5 40 4.00

Boston Favorite. (Goddard.) Pods green, splashed with red. 5 40 4.00

Canadian Wonder. Pods very long and abundant. 5 40 4.00

China Red Eye. Early. Continues long in bearing. 5 35 2.75

Early Mohawk. Can be planted earlier than most beans on account of its hardiness. 5 35 2.50

Extra Early Valentine. (Round pod.) Our stock of this important variety is 1/3 of the best. Under favorable conditions pods are usually ready to pick in about 35 days. Best for winter use. Lent grown by Southern truckers. 5 45 4.50

Early Long Yellow Six Weeks. Full flat green pods. 5 45 4.50

Horticultural. Pods full, green, splashed with red. 5 35 2.50

Pods Extra Early. Two weeks earlier than the late. 5 40 4.00

Pods Late or 1000 to 1. The best pickling sort. 5 45 4.50

PRICES:—Please note that our quart prices on Beans include PREPAYMENT OF POSTAGE by us. If wanted by Express or Freight with other Seeds, deduct 15 cts. per quart. Pints supplied at Quart Prices. Pecks and Half Bushels at Bushel Prices. One quart will plant a row 100 feet long.
Remember that our quart price on Beans include PREPAYMENT of POSTAGE BY US. If wanted by express or freight with other seeds, deduct 15 CENTS A QUART or 7 cents a pint. Pints supplied at quart price. Pecks and half bushels at bushel prices.

DWARF OR BUSH LIMA.

These easily rank as the most valuable vegetable introduction of recent years. Those who have not grown the Dwarf Lima Beans, should try them. No garden is complete, no table is properly supplied without them.

Pkt. Qt. Bu.
Burpee's, Most popular sort. Seed large...... 10c 60c $6.00
Dreer's. Fine flavor, thick, sweet and succulent... 10 60 6.00
Thorburn or Kramerle. Fine flavor............. 10 60 6.00

BEANS, POLE OR RUNNING.

Choice Navy. Pkt. 10c qt. 40c Bu. 60c $1.50 $2.00
" Medium........... 05 30 1.30
" Marrow............ 05 40 2.00

N. K. & C. California Wonder Bean.

Most productive. Commands highest price in all markets.

Your CALIFORNIA WONDER BEAN is the GREATEST YIELDER I have ever seen. I see that one of your customers grew 864 BEANS FROM ONE VINE. I HAVE JUST SHELLED THE BEANS FROM ONE STALK AND HAD 900 GOOD BEANS.

L. R. CROCKER, Minn.

The California Wonder, or Improved Tree, is easily the heaviest yielding Bean known. It is a field variety. The Seed resembles the well known "Navy," and on account of its whiteness and small size commands the highest price in all markets. It has the additional merit of being pure stock. It is to us a source of constant wonder that Bean growers, otherwise intelligent, should plant mixed seed, as mixed stock always sells at from 25 to 30 per cent. less than straight stock. A few cents extra expended on the seed means many dollars in the crop. 12 quarts of the California Wonder Bean will plant an acre. Price, large pkt., 10c; qt., 40c; postpaid. By express or freight, qt., 20c; peck, 60c, bu., $2.00; 10 bu. @ $1.75.
BEET. N. K. & CO'S SELECTED STOCK.

Our PACKETS of Beet contain on the average about 500 SEEDS. One ounce sows 50 ft. of drill. 5 lbs. for an acre.

Earliness, Color, Form, Productiveness and Quality are important points in vegetables—and the last few years have marked very great improvements in Beets. Each of the varieties shown in our list has its well-defined place. Our Beet Seed we believe to be unsurpassed for purity and excellence.

Extra Early Egyptian. The earliest sort. Turnip shaped, small, symmetrical, deep blood color. Pkt. 3cts; Oz. 7cts; ¼ lb. 36 cts; 1 lb. 40 cts.

Crosby's Egyptian. An Improved strain of Egyptian, quite as early, but larger and smoother. Pkt. 4 cts; Oz. 10 cts; ¼ lb. 20 cts; 1 lb. 60 cts.

Eclipse. Makes rapid growth. Top small, quality fine, larger than Egyptian but not as deep a red in color. Pkt. 3 cts; Oz. 7 cts; ¼ lb. 15 cts; 1 lb. 40 cts.

Edmund's Improved Blood Turnip. A handsome, clean, turnip-shaped blood beet. Skin and flesh are of a deep, blood-red, sweet and tender in quality, and unsurpassed for solidity and keeping purposes. The roots grow regular and are of good marketable size. The tops are small, allowing them to be grown closely together. They mature early, and give every satisfaction as a bunching sort. Pkt. 4 cts; Oz. 10 cts; ¼ lb. 15 cts; 1 lb. 40 cts.

N. K. & Co's Market Gardener's. This is the ideal Beet for market Gardener's and the home garden. It is very symmetrical, with small tap root and few fibrous roots; color outside is deep blood-red; inside, layers of blood-red and light-red alternately. When cooked they are a beautiful dark-red throughout, fine grained and unsurpassed in quality. At the age of "Bassano" it is larger, while it continues to grow until late in the fall, attaining a large size, and making a good selling and eating beet for winter. One sowing only is necessary to produce early beets for market and main crop for winter use. Pkt. 5 cts; Oz. 10 cts; ¼ lb. 20 cts; 1 lb. 60 cts.

Early Blood Turnip. Roots turnip-shaped, deep crimson, tender and sweet. Pkt. 3 cts; Oz. 5 cts; ¼ lb. 10 cts; 1 lb. 35 cts.

Half-Long Blood. This is rapidly becoming a very popular sort, and will probably produce more bushels from a given area than any other sort, as it does not occupy as much space in the row as the turnip-shaped varieties. Pkt. 4 cts; Oz. 8 cts; ¼ lb. 15 cts; 1 lb. 50 cts, postpaid.

Improved Long Blood. One of the best and most popular table beets, especially for autumn and winter use (our seed has been grown from selected roots and we can recommend it as superior stock). Pkt. 3 cts; Oz. 7 cts; ¼ lb. 15 cts; 1 lb. 35 cts, postpaid.

Swiss Chard or Silver Beet. Much superior to the common beet for greens, and if sown at the same time will be fit for use before them. Pkt. 3 cts; Oz. 7 cts; ¼ lb. 15 cts; 1 lb. 40 cts, postpaid.

For Mangel Wurzel, (Stock Feeding Beet), See Page 6.
For Sugar Beet, (Finest Strains), See Page 7.
WASHINGTON WAKEFIELD CABBAGE.

"First in Head! First in Market! First in the Hearts of Gardeners."

(Early.) We introduced this Cabbage in 1893, at which time our stock was limited. We received so many letters of praise and congratulation regarding it, that it seemed as though every one who tried it must have written to make known their satisfaction.

All Gardeners are so familiar with the Wakefield Cabbages that description is unnecessary. The engraving shows the character of the Washington Wakefield, and it is perhaps sufficient to say we believe it leads all other strains of this popular variety in Earliness, Size of Head and Purity of Stock.

Large pkt. 10c; oz. 30c; ½ lb. 75c; lb. $2.50.

In 1897 Angus McDowell of Wausau, Wis., wrote us: "Your Washington Wakefield beats anything I ever saw in the cabbage market." In 1898 he writes: Your Washington Wakefield and Harvest Home are the two best cabbages that grew. The Washington Wakefield was two weeks earlier than the Express or Express, and heads as hard as the late sorts.

"Out of 972 plants of the Harvest Home that I set out from a single packet of seed, not one plant failed to head."

"Any gardener giving your seeds a trial will surely order of you again."

"Your Washington Wakefield Cabbage is the surest header, and has the largest heads of any early cabbage I ever handled. Your Model Cauliflower surpasses everything I have ever had."

(Signed)

HENRY JOHNSTON, Monarch, Mont.

"I wish to let you know that the Washington Wakefield Cabbage surpassed any other variety of Early Cabbage we had here. We took the first to market July 15th. Receive my most sincere respects in promising you my full order for seeds next year."

(Signed)

JOHN ABBEY, Schofield, Wis.

Our Packets of Cabbage contain on an average about 1000 Seeds. One ounce for a bed of forty feet will produce about 2000 plants.
HOLLAND CABBAGE.
(The Genuine Stock.)

In some important particulars, this is the most remarkable Cabbage yet produced. In fact, it well illustrates the truth that “merit will win,” in that while it was introduced only about four years ago, it has already become the favorite sort with those who have had the true stock. The heads, which are very solid and deep, are of medium size, averaging about 8 lbs. in weight; in color they are entirely distinct; in point of quality they have no superior, and they keep better than any other sort, the heads being as solid and perfect when taken up in the spring as when put away in the fall. At that time no cabbage will sell beside them even at one-half the price. Large pkt. 5c; oz. 30c; ½ lb. 85c; lb. $3.00.

Mr. B. L. Grant of Hudson, Wis., writes: I am very pleased with your stock of Holland Cabbage. The seed for eight acres was from you; that for four acres was from another firm. Yours was splendid. The Cabbage on the other four acres was not good and they rotted very badly. I regard the Holland as the coming Cabbage. Shall plant twenty acres of it next year, and shall want your seed exclusively.

In the past twelve years I find I have bought from your house over 3,000 lbs. of Onion Seed, large quantities of Cabbage and other seeds, and they have always proven uniformly good, both as respects purity of stock and strong germination.

Mr. Lupton, Considered by Mr. Lupton, the well known cabbage specialist, to embody all the points to be desired in a late cabbage. It is a selection from Excelsior Flat Dutch, and a little earlier. Color dark bluish green. Stem short and strong, heads large, but not coarse. An excellent keeper. Pkt. 5c; oz. 20c; ½ lb. 50c; lb. $1.75.

Bridgeport Drumhead, Late, head large, very solid, good shipper. Pkt. 5c; oz. 20c; ½ lb. 50c; lb. $1.50.

Louisville Drumhead. Popular in the South. Pkt. 5c; oz. 20c; ½ lb. 50c; lb. $1.50.

Northrup, King & Co.,’s Selected Late Flat Dutch. A low growing variety, heads large, bluish green, round, solid, broad and flat on the top; an excellent fall and winter variety, and a good keeper. It is a sure header. Our stock has been grown from carefully selected heads, and we consider it superior to any other strain of Flat Dutch Cabbage on the market. Large pkt. 5c; oz. 15c; ½ lb. 35c; lb. $1.25.

Northrup, King & Co., Minneapolis, Minn.

Gentlemen—You ask me if I have any objection to your referring gardeners to me, as to the reliability of the seeds I have had from you. In reply would say that I not only have no objection, but, on the contrary, it will afford me very great pleasure if I can be of service to you in this way. I have purchased the greater part of my seeds from your house for the last fourteen years, and speak from long experience when I say they have given perfect satisfaction. Can one say more? Yours very truly, (Signed) FRED BUSCH.

Mr. BUSCH, who writes the above letter, is the most extensive Market Gardener in the State of Minnesota. He owns one-hundred and twenty-six acres, about 175,000 feet of glass. His specialties are Cucumbers, Tomatoes, Radishes and Lettuces. These he sells not only throughout the Northwest, but ships largely to Chicago, St. Louis and other leading markets. The preceding statement from a man like Mr. Busch means a great deal.
CELEERY, ETC.

Our Packets of Celery contain on the average about 6,000 Seeds.—One Ounce of Seed will produce about 3,000 Plants.

Kalamazoo. Named and introduced by us 1888, and we have never seen a better Celery since that time, when we sent it out as the best celery grown. Not a self-blanching variety, but well repays the slight extra labor in treating it. Perfectly solid, beautiful cream color.

Crisp and nutty in flavor. 10c 30c 75c $2.75

Golden Self-Blanching. Solid, resembling White Plume, except it is a rich golden yellow. Without banking or any covering assumes a beautiful golden color. 10 25 75 3.50

Perfection Heartwell. Finest and largest of the winter varieties. 5 15 49 1.25

Henderson's White Plume. Handsome, crisp, self-blanching sort, of very easy cultivation. The earliest known. 5 15 50 1.50

Dwarf Golden Heart. Well known popular variety. Excellent keeper. 5 15 40 1.25

Giant Pascal. A large growing sort, of superior flavor. Excellent for late use. Easily blanched. 5 15 40 1.25

Pink Plume. One of the best of the red celeries. Of fine table quality and an excellent keeper. 5 15 60 2.00

CELERATIC. Turnip Rooted Celery. Large Erfurt. Roots large, smooth, excellent flavor. 5 10 35 1.25

CHERVIL. Curled. For flavoring and garnishing. 5 10 20 60

Tuberous. Roots edible. 5 10 35 1.00

CHICORY. Large Rooted. The roots are much used for coffee. 5 15 40

COLLARDS. True Georgia. 5 15 40

GOLDEN SELF-BLANCHING CELERY.

N.K & Co.'s SPECIAL STOCK.

TRY THIS SPLENDID CELERY.
CARROTS

NORTHROP, KING & CO.'S. EXHIBITION STOCKS, IDEAL IN SHAPE & COLOR.

OUR PACKETS of CARROT contain on the average about 6,000 SEEDS.
One ounce will sow one hundred feet of drill. 3 to 4 lbs. for one acre.

Early French Forcing. The earliest variety, largely grown for forcing purposes; globular shaped root of an orange red color. Pkt., Set: Oz., 10c; ½ lb., 20c; lb., 60c, postpaid.

Early Scarlet, or Short Horn. One of the most popular varieties grown; color deep orange; one of the best for table use. Pkt., 3c; Oz., 10c; ½ lb., 20c; lb., 60c, postpaid.

Oxheart, or Guerande. This fine and very popular Carrot is intermediate as to length between the half long varieties (such as Danvers) and the Scarlet Horn Carrots, but much thicker than the latter, being at the top from four to five inches in diameter. Flesh bright orange, fine grained and sweet. It is of very fine quality for table use and equally good for stock. Where other sorts require digging, Oxheart can be easily pulled making it a particularly desirable sort for soils so stiff and hard that other sorts do not do well. Pkt., 3c; Oz., 10c; ½ lb., 20c; lb., 60c, postpaid.

Chantenay. As a table variety it is first-class; in shape it is larger than the Scarlet Horn, and also broader at the shoulder. The flesh is of a beautiful rich, orange color, and of the finest quality; it is medium early, with small tops. Roots taper slightly but are uniformly stump rooted. Gives great satisfaction in both the market and private garden. Pkt., 3c; Oz., 10c; ½ lb., 20c; lb., 60c, postpaid.

Improved Danver's Half Long. A first-class carrot for all soils; in form midway between the long Orange and Short Horn. The root is of a rich, dark orange color and grows very smooth and handsome; twenty to thirty tons per acre being no unusual crop. Pkt., 3c; Oz., 10c; ½ lb., 20c; lb., 60c, postpaid.

Improved Long Orange. A well known standard sort, roots long, thickest near the crown, tapering regularly to a point; color deep orange; suitable for the table and main field crop. Pkt., 3c; Oz., 10c; ½ lb., 15c; lb., 50c, postpaid.

For Stock Feeding Carrots, see Page 7.

Our MASTODON (white) and VICTORIA (yellow) lead all other varieties. They are of IDEAL SHAPE. EASILY LIFTED FROM THE GROUND, FINE IN QUALITY and ENORMOUSLY PRODUCTIVE.
Everyone Welcomes the first Sweet Corn of the season, and there is a natural strife among gardeners to realize the excellent price that the earliest corn of good quality invariably brings.

Market Gardeners and Private Planters do well to consider, that our Northern Grown Seed will give them earlier corn than will seed of the same varieties grown farther south. Our Seed Corn is thoroughly tested, before it leaves our hands.

NOTE: We are frequently asked what varieties should be planted in order to secure a succession of sweet corn throughout the season. To all who are in doubt, and those already satisfied, let us say: Plant White Cob Corn, for earliest; Portland, for medium, and N. K. & Co's Zig Zag, for late, and secure the very best sweet corn in each class.

**SWEET CORN.**

One quart will plant 200 hills; 8 to 10 quarts for an acre in Hills. OUR PACKETS contain on the average about 150 seeds. Please bear in mind that our quartz INCLUDE POSTAGE. Pints supplied at quart. Pecks at bushel prices. Deduct 5 cts. a pint, 10 cts. a quart if sent by express or Freight.

**EXTRA EARLY.**

**SECOND EARLY.**

Portland Sweet Corn. This variety is not quite as early as the Cory but nearly so, and it will pay you to wait a few days for it. In sweetness and delicacy of flavor it excels any early Sweet Corn grown. Private families pronounce it the best. Market gardeners capture the trade with it.

**LATE.**

Zig Zag Evergreen. N. K. & Co's Zig Zag Evergreen. We wish to call special attention to this corn, introduced by us in 1894. It has, at experiment stations, in the principal markets of the country, and in thousands of private gardens, sustained our claim as being the sweetest of all the Sweet Corn. It ripens earlier than the Stowell's Evergreen remains fit for use longer than the Stowell's Evergreen, and any other variety, and furnishes corn of the finest quality up to time of frost.

Stowell's Evergreen. One of the most popular varieties.

Black Mexican. Grains black, very sweet.

Egyptian. Very sweet, and tender.

Mammoth. Ears large, rich and sweet.

Country Gentleman. Ears large, rows irregular, quality delicious.

Sweet Fodder Corn. (See Field Seeds, page 15). For Field Corn see pages 10, 11, 12 and 13.

**EXPERT OPINIONS.**

Mr. Carman, editor of the Rural New Yorker pronounces N. K. & Co's "Zig Zag" "the finest quality and the heaviest yielding" sweet corn he ever tried. "Always two and often three ears on a stalk." The Michigan Experiment Station says of our "Zig Zag," "Ears good size and well filled out. It reaches maturity with the Stowell's Evergreen and continues to furnish edible corn longer than any other variety that we ever tested. Its season this year extended over a period of three weeks, when it was cut with frost. At that time it looked as good and vigorous as ever."

The New York Experiment Station said:--"The Zig Zag Evergreen Sweet Corn sent to this station for trial has proved itself one of the best late corns we have ever tested. This makes it especially valuable, as early varieties are offered in abundance."
CUCUMBERS.

Our Packets of Cucumbers contain, on the average, about 300 Seeds.

Northrup, King & Co.'s
School Garden
Flower Mixture.

$150.00 IN CASH
TO BE PAID IN PRIZES AS FOLLOWS:
$100.00 (in seven prizes) for the greatest number
of species grown from a single packet of N., K.
& Co.'s School Garden Flower Mixture.
$30.00 (in three prizes) for the Best Photographs of
the Gardens,
$20.00 (in three prizes) for the best essays on How
to Grow the School Garden Mixture.

FOR FULL PARTICULARS OF COMPETITION, SEE FOURTH PAGE OF THIS INSERT.

Our School Garden Flower Mixture and ITS NAME had origin in a work that was
undertaken in 1883, by the Woman's Improve-
ment League in Minneapolis, towards interesting children of the Public Schools of this city in the knowledge
and culture of flowers.

As it was desired that each child should grow a number of varieties, the League was at the outset con-
fronted with the problem of how to furnish so many thousand pupils a sufficient assortment with the com-
paratively small amount of money available for that purpose.

In discussing this matter with us, we suggested that a mixture be made of a number of the best and
most popular annual varieties, and that a large packet of this mixture be given to each scholar. This
plan was adopted, and for the results obtained it is sufficient to refer to the letters from Dr. CHAS. M. JORDAN,
Superintendent of the Minneapolis Public Schools, Mrs. T. B. WALKER, of this city, and Mrs. BARNARD,
Chairman of the League Flower Committee, as well as to the fact that for the past five years we have SUP-
PLIED THIS MIXTURE FOR THE SAME PURPOSE TO THE WOMAN'S IMPROVEMENT LEAGUE.

So popular did this mixture become, locally, that we last year decided to offer it for sale, and in order to
introduce it we fixed a nominal price of 10 cents a packet, and offered $50.00 in CASH PRIZES
to those growing the largest number of varieties from a single packet.

Elsewhere will be found the report of the awards, together with the letters and photographs of successful
competitors.

This Mixture gave such universal satisfaction, and the contest awakened such interest among our cus-
tomers, that we have decided to this year offer CASH PRIZES amounting to $150.00, which
will be paid as hereinafter specified to those sending in their reports on or before November 1st, 1899.

Caution. We wish to emphasize the fact that our SCHOOL GARDEN FLOWER MIXTURE is
not to be IN ANY WAY compared with mixtures offered as "WILD FLOWER GAR-
DEN MIXTURE," or under any other name. These, for the most part, are made up
from seeds that have been "left over" at the end of the season, or that have lost vitality.

Our School Garden Flower Mixture is composed of the FINEST and FRESHEST
SEEDS OBTAINABLE, and contains the
RAREST and MOST BEAUTIFUL annual sorts, obtained at large expense from the most reliable flower seed
specialists of America and Europe, ESPECIALLY FOR THIS PURPOSE.

The price at which we now offer this Mixture, 25 cents, has enabled us not only to INCREASE
THE SIZE OF OUR PACKETS, but to add many NEW and MAGNIFICENT sorts, so that now it might well
be called THE COMPLETE FLOWER GARDEN MIXTURE, embracing, as it does, NEARLY EVERY DESIR-
ABLE FLOWERING ANNUAL GROWN.

A LARGE PACKET, amply sufficient to plant a bed 30 FEET SQUARE, WILL BE SENT POSTPAID TO
ANY ADDRESS ON RECEIPT OF 25 CENTS. (Stamps accepted.) FULL CULTURAL DIRECTIONS ARE
PRINTED ON THE BACK OF EACH PACKET. THE POSSESSION OF THE PACKET ENTITLES THE
HOLDER TO COMPETE FOR THE $150.00 CASH PRIZES.
School Garden Flower Mixture Prize Winners for 1898.

We take pleasure in presenting portraits of four of the Prize Winners in the School Garden Flower Mixture Contest of 1898. We were unable to secure in time for publication the picture of the winner of the fifth prize, Mrs. Charles C. Case, of Chatfield, Minn.

How the Prizes Were Awarded.

The letters and lists received up to Nov. 1st, and of which there were several hundred, were, shortly after that date, placed by us in the hands of S. B. Green, Professor of Horticulture in the Minnesota State University, who appointed a committee of students to examine the claims and award the prizes. The report of the committee is as follows:

NORTHUP, KING & CO., Minneapolis, Minn.,

Dear Sirs: The committee appointed to examine the reports sent in by the contestants for the prizes offered by you in connection with your School Garden Flower Mixture, find that, in our judgment, the following persons are entitled to prizes:

<table>
<thead>
<tr>

</table>

$25.00 | $15.00 | $10.00 | $5.00 |

We found it quite difficult to award these prizes, as many of those reporting did so very indefinitely. Some reported on the number of colors instead of varieties or species, and others the number of plants grown. In reading these reports we could not but be impressed with the fact that everyone seemed to be very much pleased with this mixture, producing, as it did, such a large number of varieties and so beautiful a display of colors.

What Those Who Have Grown Our "School Garden Mixture" Think Of It.

Our space only admits of brief extracts from a few of the many hundreds of letters we have received expressing the satisfaction this mixture has given those who have tried it, and it is no exaggeration to say that we could fill this entire catalogue with the letters received praise of this prize mixture and the satisfying the most unskillful flower growers, as well as the youngest and most inexperienced beginner in flower culture.

"The Most Beautiful Garden."

From a packet of your "School Garden Mixture" I succeeded in having the most beautiful Flower Mixture. The flowers in it have been all summer. They have been greatly admired. There were many flowers I never saw before.

"Different Flowers All the Time."

The flowers from your "School Garden Mixture" were very handsome. It was the prettiest bed in the yard. Different flowers all the time.

"The Best Garden for Miles Around."

I never had so beautiful a flower garden in my life. Something new nearly every day for a long time, and the garden seeds were everything one could expect. We had the best garden for miles around. Everybody that came asked where we got our seeds.

"Comfort to Me."

I had a beautiful bed of flowers from your mixture. They were much comfort to me.

"I Was Delighted."

I was delighted with the "School Garden Flower Mixture." We have been in bloom since the middle of June.

"All the Seeds Must Have Come Up."

The flowers in this mixture were so satisfactory, I assume they came up in another year. I had 15 varieties, some very beautiful flowers. I think all the seeds must have come up.

"Lovely!"

I have heard these flowers to my neighbors and they thought them lovely.

"Made a Beautiful Collection."

I was much pleased with my success with your School Garden Mixture. I had 32 entirely different kinds of plants, and so many different colors of almost every kind that it produced altogether 11 different varieties of blossoms. I made a beautiful collection of pressed flowers.

"Simply Beautiful."

I had 80 varieties of the "School Garden Mixture," and they were simply beautiful. To say that I was pleased with my seeds would not half express it. With the exception of one packet they all did wonderfully well. The California Wonder Beans were just what we had been looking for and never found before. The vines were just loaded with pods.

"Worth Dollars to Me."

Our neighbors were all amazed to see such a pretty flower garden in bloom all summer. We heard it beat theirs all hollow. Everyone said that the flowers were just fine. I thought so too, when I could get a nice bouquet at any time. They were worth dollars to me.

"Wonderful to Behold."

The Prizes from your "School Garden Mixture" were something wonderful to behold, as there were eight different varieties of these alone.

"Bed of Beauty."

In spite of the heavy rains the "School Garden Mixture" was a great success. They were a bed of beauty. Our garden is near the road and everyone seemed to admire them, and often would come in to look at them.
Letter from Dr. Charles T. Jordan, Superintendent of Minneapolis Public Schools.

MINNEAPOLIS, NOV. 1st, 1887.

GENTLEMEN: I desire to express the obligations under which the public schools of this city are to your firm. Our pupils have shown in the flower work organized among the pupils of the public schools by the Woman's Improvement League. This movement has already accomplished a great work. It has interested thousands of the school children in the cultivation of flowers, and has done a great deal toward beautifying the city. Many an unsightly yard has been transformed into a beautiful flower garden by means of the flower seeds which were generously contributed by Northrup, King & Co. These seeds, so far as I have been able to observe, "always grow."

Yours very truly,

CHAS. M. JORDAN, Supt.

"A Pretty Sight."
The flowers grown from your "School Garden Mixture" were as pretty a sight as any one ever saw.

MRS. G. E. GROVES, Coffeeville, Miss.

"Something New."
From your "School Garden Mixture" I realized a great deal of pleasure looking for something new every day.

MRS. H. J. DRATS, Sciotia, Ill.

"Took Premiums."
I was very much pleased with results. There were eight different kinds of flowers that I did not know the names of. Had never seen anything like them. We took some premiums this fall on these flowers.

MRS. FRED WEGERS, National, Ia.

"A Wonder."
The seed I bought of you all germinated well, both vegetable and flower. Think the flower seeds must have all come up, for there were about 200 poppies. My yard has been a wonder to my neighbors.

MRS. P. W. FARRAR, East Peru, Me.

"Admired by All."
My daughter, Maud, planted one of the packets of your "School Garden Flower Mixture," and she raised the finest kind of flowers I ever saw. Every one that saw them admired them. We counted over 300 plants that bloomed.

C. M. DAVIS, Smith's Grove, Ky.

"Gave Pleasure."
I cannot tell you how much pleasure that flower bed gave my children. Every day they went to see it and would find something new.

MRS. GEORGE BECK, Rutledge, Minn.

"Prettiest in the Garden."
I was very much pleased and surprised with the "School Garden Flower Mixture." Every day something different.

MRS. MAUD MCKEE, Fergus Falls.

Letter from Mrs. Barnard, Chairman Flower Committee, Minneapolis Improvement League.

MINNEAPOLIS, May 1st, 1887.

GENTLEMEN: I have been very much interested in the flower work of the Woman's Improvement League of this city from the beginning of their work five years ago. They have spared neither labor nor money in carrying out their schemes for the beautifying of the city through the encouragement of horticulture by the wholehearted work with the city to disappear, and many an uninviting neighborhood have become like a school garden. The importance of this part of the city to the health of the children of the little gardens.

Our firm desires of great credit for the assistance which you have rendered the league in assisting to furnish the seeds for their work, and they appreciate most highly what you have done. I sincerely hope that other cities and country neighborhoods will adopt the same plans of encouraging the children to "cause the wildness of flowers to live through the love of beautiful flowers, grown by their own hands.

MRS. T. B. WALKER,
$150.00 IN CASH

WILL BE PAID AS FOLLOWS AS PRIZES FOR

NORTHRUP, KING & CO.'S

School Garden Flower Mixture.

$100.00

For the Greatest Number of Species grown from a single package.
First Prize, $40.00; 2d, $25.00; 3d, $15.00; 4th, $10.00; 5th, $5.00;
6th, $3.00; 7th, $2.00.

Contestants will please observe that the $100.00 prizes are for the greatest number of SPECIES, not Varieties, grown from a single package. For instance, Asters would count as one, no matter how many different colors or kinds there may be.

$30.00

For the Best Photographs of the Gardens grown from our School Garden Flower Mixture.
First Prize, $15.00; 2d, $10.00; 3d, $5.00.

$20.00

For the Best Essay on "How to Grow Northrup, King & Co.'s School Garden Flower Mixture."
First Prize, $10.00; 2d, $5.00; 3d, $3.00; 4th, $2.00.

CONDITIONS OF COMPETITION.

Reports, Photographs and Essays must be accompanied by the envelope in which the seed was received, and must be received by us on or before Nov. 1st, 1899.

Our checks for the amount due the prize winners will be forwarded as soon after Nov. 1st as the decision can be made. The names, addresses, and (if possible) the pictures of successful competitors will be given in our Catalogue for 1900. While all cannot win the cash prizes, everyone who purchases a package of the School Garden Mixture will feel amply repaid for their investment in the beauty and variety of the flowers they secure.

This mixture is sure to be popular with everyone. Even practiced floriculturists will find much to interest and surprise them in the variety and beauty of the flowers, while children are simply delighted and can scarcely wait until the flowers are unfolded, in their anxiety to see what they are "going to be."

REMEMBER

That the possession of a packet entitles anyone to compete for the above mentioned prizes, and will be mailed to any address on receipt of 25 cents.

SPECIAL NOTICE.

Do not overlook our offer to send a regular package of our School Garden Mixture free with every order for Vegetable or Flower Seeds (or both) in packets, amounting to 75 cents, at prices named in our Catalogue.

This offer does not apply to seeds by the pound or bushel, but only to Vegetable and Flower Seeds in packets.
The Most Wonderful Green-house in the World.

At first sight, the reader will naturally inquire, what can there be about this small, rude, constructed affair, to entitle it to be called, "The most wonderful greenhouse in the world?"

We think, however, that the few facts our space allows us to present, will justify that title and interest our readers.

The greenhouse, of which our illustration is a direct reproduction, is situated in Upper Geyser Basin, Yellowstone National Park, Wyoming. The altitude at this point is 700 feet above sea level, and there is not a month in the year that ice does not at some time form. Nevertheless, this greenhouse is heated without fire, and produces vegetables of the finest quality, in a shorter space of time from the planting of the seed, than any other greenhouse in the world.

The simple facts are these: The greenhouse is built over a running stream, which comes from a six inch hole in the formation, at a temperature of 165° F. This not only at all times, furnishes ample heat, but the vapor with which the vegetation is constantly surrounded, hastens its growth to an astonishing degree. For instance: Lettuce planted from dry seed came up in two days; Cucumber in three days; Radishes in four days. Lettuce, twenty-eight days after planting, measured twenty-two inches across. Cucumbers were gathered in thirty-four days after planting, and yielded almost beyond belief.

We are indebted to Mr. W. P. Howe, manager of the hotel at Upper Geyser Basin, and the originator and builder of this unique greenhouse, for the above and many other interesting particulars about it. We have also learned that Mr. Howe, very kindly, (and without our knowledge,) caused a large sign to be painted and prominently displayed on the premises, bearing the words: "THE SEEDS USED IN THIS GREENHOUSE ARE FROM NORTHUP, KING & CO., SEEDSMEN, MINNEAPOLIS."

Over four thousand people visited this curious vegetable house during the season of 1897, and with one accord pronounced it one of the greatest wonders of the Yellowstone National Park.

LETTUCE.

Our Packets of Lettuce contain on an average about 2500 Seeds.

THE "ROCKY FORD."

Rocky Ford Musk Melon.

MUSK MELON.

Northrup's Yellow Meated Japan.

Northrup, King & Co., Seed Growers, Minneapolis, Minn.

THE ROCKY FORD MUSK MELON.

The Melon known on the "bills of fare" of the leading hotels and restaurants of America as the "Rocky Ford Canteloupe" takes its name from the little town of Rocky Ford, Colorado, which has become as famous for its melons as is Baltimore for its oysters. The shipping of these melons has reached such proportions as to cause it to become the leading industry of the town, thousands of crates being annually forwarded to the principal cities of the United States.

The reason for the wide-spread popularity of these melons is two-fold. First, its superb table qualities, being firm, sweet, and remarkably solid. Second, its wonderful shipping qualities, which enable it to be carried great distances, and yet arrive in first-class condition for market. The fruit is of medium size, oval shaped, heavily netted and very solid. The flesh is green, thick and juicy.

It is very early and wonderfully productive. No doubt there will be a very large demand for this variety the coming season, and inferior stock will be put upon the market.

We obtained our seed at high cost direct from Rocky Ford. Those who purchase their seed from us can fully rely on securing the genuine stock.

Pkt. 15c., oz. 30c., 1/4 lb. $1.00, lb. $3.00.

Northrup's Yellow Meated Japan.

Our packets of Musk Melon contain on the average about 250 seeds.

Large Pkt. Oz. 1/4 lb. Lb.

Northrup's Yellow Meated Japan

Northrup, King & Co.'s Cream Canteloupe. Large size, medium early and the best shipper of all the yellow flesh varieties. Splendid full flavored sort, but lacks the fine melting quality of Yellow Meated Japan

5c 15c 50c $1.50

Extra Early Citron or 'Nutmeg. Very early, good size, green flesh, heavily netted, excellent quality

5c 15c 50c $1.50

Emerald Gem. Extra Early, small, skin dark green, flesh orange, very sweet

5c 15c 50c $1.50

Osage. Oval, medium size, green skin, yellow flesh, excellent quality

5c 15c 50c $1.50

Jenny Lind. Very small and very early; flesh green and of fine flavor

5c 15c 50c $1.50

Hackensack. Large, round, skin and flesh green; quality good

5c 15c 50c $1.50

Banquet. Round, densely netted; flesh salmon in color and very sweet

5c 15c 50c $1.50

Banana. Much resembles the fruit from which it takes its name, not only in shape but in flavor

5c 15c 50c $1.50

Early Netted Gem. Very early, small, coarsely netted, green flesh, fine flavored

5c 15c 50c $1.50

Extra Early Hackensack. Very popular in some markets. Heavily ribbed, coarsely netted

5c 15c 50c $1.50

Baltimore or Acme. Fruit medium size, oval, netted. Flesh thick, green, sweet

5c 15c 50c $1.50

Cosmopolitan. Fruit oval, light green, netted. Flesh green, sweet and highly flavored

5c 15c 50c $1.50

Osage or Improved Miller's Cream. Medium sized, dark green in color. Flesh deep salmon color, very thick and of splendid flavor

5c 15c 50c $1.50

"Rocky" Giant. Largest of all canteloupes; skin yellowish green. Flesh light salmon

5c 15c 50c $1.50
N.K. & Co.'s KLONDIKE
THE EARLIEST WATER MELON

AN EXPERT OPINION.—"We like de KLONDIKE, kase we don't have to wait so long fer 'em, see!"

WATER MELON.

Our Packets of Water Melons contain on the average about 100 Seeds.

Northrup, King & Co.'s Klondike. The earliest. The great objection to the extremely early water melons has been their inferior quality. This has been entirely overcome in the KLONDIKE, which is offered with the full assurance of not only being remarkably early, but as sweet, delicate, and melting in flavor as any variety grown. The flesh is of deep scarlet. Rind thin and on this account is not a particular good shipping sort. It will ripen in altitudes where it has not been thought possible to mature a good water melon. It is to all other varieties of water melons, what the early Minnesota is to tomatoes. The earliest and of quality second to none. Pkt. 10c; Oz. 20c; ½ lb. 40c; 1 lb. $1.00.

Duke Jones. This is the latest introduction of Mr. Girardeau, the "Melon King" of Florida. Dark green rind; bright red flesh, early, prolific, very large. The agent of the road over which Mr. Girardeau shipped his melons states that "several carloads averaged over 40 lbs. to the melon." Large Pkt. 3 oz. 15c; ½ lb. 20c; 1 lb. 35c.

Green and Gold. Golden orange flesh, skin very dark green; intermediate; a unique sort. Kolba Gem. Large; bright red; fine quality. Pride of Georgia. Round; large; crisp; bright red flesh. The Boss. Oblong; dark green; flesh deep scarlet; and thin rind; intermediate.

Dark Icing. Solid, with thin dark green skin; of superior quality; white seed; early.
Mammoth Ironclad. Long; large; late; red flesh; good shipper.
Piney. Early and of good quality; red flesh.
Dixie. New; large and solid; flesh red; intermediate.
Seminole. Very large; quality first rate; intermediate.
Cuban Queen. Solid; heavy; excellent quality; early.
Black Spanish. Large roundish; dark red flesh; early.

Ice Cream or Mountain Sweet. Old reliable sort; flesh red; late.
Southern Rattlesnake. Oblong; striped; red flesh; late.

Peerless. An excellent variety for family and local use. Flesh scarlet.

Jumbo. Very large; flesh red; very sweet; a good shipping sort; intermediate.

Melon Peach. The fruit is about the size of a large peach, oval shaped, and of a bright orange color, somewhat russeted. For sweet pickles, pies, or preserving, they are superb; a few pieces of sliced lemon or a little lemon essence adds to their flavor, and is usually desirable. They are easily cultivated, wonderfully productive and can be used in every way in which you would use a peach, except that they are not usually liked raw; although some consider them excellent simply sliced with a little sugar on. Pkt. 3 oz. 30c.

Kentucky Wonder. We introduced this melon in 1888. At that time we thought it the best melon; in 1888 we think the same. This is one cause for criticism on many of the new melons that have of late been sent out. It is that for the most part they have been, at the best, slightly improved strains of some old and well-known sort. This cannot be said of Kentucky Wonder. It is distinct and the melon itself proves it. In shape it is oblong, attaining a good size, skin dark green and beautifully marked. Flesh a beautiful rich scarlet color, crisp, rich, sugary, always firm and solid, never mealy or tough. Kentucky Wonder has won first prize over such well-known and popular sorts as Ironclad, Cuban Queen, Kolba's Gem, etc. Large Pkt. 5 oz. 10c; ½ lb. 20c; 1 lb. 30c.
We consider our Minnesota Grown Onion Seed the Finest in the World. We do not believe that any seed grown will produce Onions that will Ripen as Early, Keep as Long, or produce as small a percentage of “thick necks” or “scullions.”

ONIONS.

Our Packets of Onion contain on the average about 1,500 Seeds. One ounce will sow 100 feet of drill; 4 to 5 lbs. to the acre are required for large Onions, 50 to 60 lbs. to the acre for sets or pickles.

Extra Early Red Flat. (Sometimes called Extra Early Red Wethersfield.) A medium sized flat variety, good yielder. Ready for use about two weeks earlier than Large Red Wethersfield. Very desirable for early marketing. Best where seasons are very short. Good keeper.......................... 5c 10c 35c $1.25

Large Pkt. OZ. 1/4lb. Lb.

Extra Early Red Globe. Much used for early bunch onions. Not a good keeper. 5c 10c 35c $1.20

Early Red Globe. (Gregory’s Strain.) Ten days earlier than the Southport Red Globe. 5 20 70 2.50

Southport Red Globe. The Standard Red Globe; productive; splendid keeper. Attains large size; quality excellent. 5 20 70 2.25

Large Red Wethersfield. The Standard Red sort; attains a large size; very popular; a splendid keeper. 5 12 35 1.25

Yellow Globe Danvers. Perfectly globe shaped; heavy cropper; excellent keeper, and attains large size. 5 12 40 1.40

Southport Yellow Globe. Spherical in shape; later than Yellow Globe Danvers. Color, rich yellow. 5 12 35 1.25

Yellow Danvers. A standard sort; roundish; excellent keeper. In productiveness exceeds all other varieties. 5 12 35 1.25

Yellow Strasburg or Dutch. Later and more flat than the Danvers. The best sorts from which to grow “sets”. 5 12 35 1.25

White Portugal or American Silverskin. Produces early onions of mild flavor; largely used for growing sets and pickles. 5 20 60 2.00

Paris White Silverskin. An early, small, round, white variety. Excellent for bunching, pickling, etc. 5 15 40 1.40

White Globe. (Minnesota Grown.) Best keeper of the white varieties. Large size; handsome form; mild flavor. 5 20 75 2.50

White N., K. & Co.’s Pickling. For early bunching, pickling and sets. Small, hard, round; keeps well; does not turn green when exposed to the sun. 5 15 50 1.75

White New Queen. Small; noted for extreme earliness and mildness of flavor; much used also for pickling. 3 10 30 1.00

"I made a mistake in planting the Red Wethersfield Onion I got from you. I put the seed in thick, allowing for bad seed, but they all came up, and gave me the trouble of thinning them out. It is a marvelous onion."—ANGUS MCDOUGELL, Waunakee, Wis.

"Your Red Wethersfield Onions were the finest I have ever grown."—D. H. TRACY, Effington, S. D.
NORTHROP, KING & CO.

**GLOBE WETHERSFIELD ONION**

The Onion above illustrated is a direct reproduction from a photograph of an average specimen of Northrup, King & Co.'s GLOBE WETHERSFIELD ONION and fairly shows its natural size and shape.

This is really a Red Globe Onion of the finest and most select type and we believe it to be unequaled by any stock in existence. We have called it N. K. & Co.'s Globe Wethersfield in order to distinguish it from all other stocks of Red Globe Onion from which it differs, not only in purity of stock and perfection of shape, but in earliness, productiveness and beauty of color. The outer skin possesses that lustre and richness of color so desirable and yet so often lacking in Red Globe stock. We have been led to pay special attention to this onion, as we believe Globe Shaped Onions to be the onion of the future. They are most attractive in appearance, most economical in use, and usually they command the highest price. They are more profitable than flat varieties to grow, as they occupy no more room in the row, but weigh more and measure better. Price: large pkt. 10c, oz. $0.50 lb., $1.00; lb. $3.25.

CAUTION: For the protection of our customers and ourselves, every package of the onion sold whether it be large or small, will bear a fac simile of our trademark as shown at lower right hand corner of this page.

Field of N. K. & Co.'s Globe Wethersfield Onions.
(From a Photograph.)

---

**Mr. Massie's Statement**

I certify that I personally attended to the selection and planting of the Globe Wethersfield Onion, and that the onion shown in the accompanying illustration correctly represents in shape and size all the bulbs from which the crop of seed was produced. I also attended to the threshing, cleaning and testing of said seed, and believe it represents pure and select a lot of Onion Seed as is possible to produce.

CHARLES C. MASSIE.
Minneapolis, Dec 29th, 1897.
ONIONS.

PRIZETAKER. This onion has become a great favorite on account of its large size and great solidity. It is perfectly globose-shaped, with bright straw-colored skin; the necks are very small and the onion always ripens up hard. An excellent keeper, exceedingly fine flavor, grows to an enormous size. Onions weighing 6 lbs., having been grown from seed the first year. One of our Minnesota customers reports that he sold during the past season a large portion of his crop at $1.25 a bushel, and at a time too when ordinary onions were going slowly at 50 cents a bushel. Prize-taker is the favorite variety for transplanting. On account of its being some what late, it is not recommended for general planting in the extreme north. Large pkt. 5 cts.; oz. 10 cts.; ¼ lb. 50 cts.; lb. $1.50, postpaid.

GERMUDA ONIONS. These onions grow to an immense size and are of beautiful form. The skin is very thin; flesh white, fine-grained, of mild and pleasant flavor. It will grow an onion from one to one and a half pounds from seed, but to attain the full size the bulb should be set out the following spring. White or red, each, per pkt. 10 cts.; Oz. 20 cts.; ¼ lb. 30 cts.; lb. $1.50, postpaid.

SPANISH KING. This handsome variety is a splendid type of the Yellow Spanish Onion. The flesh is remarkably firm and of the finest quality, of rapid growth and matures early. The skin is of a transparent golden straw color. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 30 cts.; lb. $1.00, postpaid.

AUSTRALIAN BROWN. Remarkable for its long keeping qualities. The quality is excellent and it is earlier than the Yellow Danver.

White ONION. This variety is most distinct on account of its great earliness. It is earlier than the White Queen. It is of a beautiful waxy white color and grows 1½ inches in diameter and ¾ of an inch thick, with finely formed bulbs, slightly flattened at the top. Its earliness will highly recommend its use as a substitute for onion sets. An excellent picking sort. Postpaid

Large Pkt. Oz. ¼ lb. lb.
5c 20c 50c $1.50

THE FARMER'S GARDEN.

Farmers as a class do not have good gardens. This is doubtless owing to the rush of work in the spring, and to the fact that hand labor is expensive and not always available.

Mr. A. K. Bush, Horticulturist, with the Minnesota Farmers' Institute, also a practical gardener and farmer, has at our request, prepared an illustrated plan of the Farmers Garden, he is advocating. It is the most practical thing of the kind ever brought to our attention, and does away very largely with hand labor. Mr. Bush's plan provides for a Fruit and Vegetable Garden that may be easily cared for with the aid of a horse and ordinary farm cultivator. It is illustrated by a diagram, and instructions are given as to culture, rotation, etc. Every farmer, in fact every one who has or wants a garden, should have this folder, entitled, "THE FARMER'S GARDEN." It is Free to those who send us an order and ask for it.

Scientists make the startling assertion that lung and kidney ailments are rapidly increasing among the farmers of America, and assign as one of the principal reasons, the lack of vegetable food in sufficient variety.
--THE--

IMPORTANT OF USING NORTHERN GROWN ONION SETS.

Onion Sets are planted in order to obtain onions earlier than they can be had from seed. It follows therefore that Northern Grown Onion Sets will produce onions earlier than southern grown sets. In addition to this our sets are incomparably superior to ordinary stock, being of small size, sound and free from trash. PRICES subject to market changes.

N. K. & Co.'s White Silverskin Onion Sets.

PARSLEY.

Our Packets of Parsley contain on the average about 2000 Seeds.

Champion Moss Curled Parsley. For garnishing; no variety is more attractive when well grown; resembles a tuft of finely curled moss, is hardy and slow in running to seed. Pkt., 3c; oz., 7c; ½ lb., 20c; 1 lb., 60c; postpaid.

Emerald. Distinct in appearance from any of the other varieties, being of a lighter and more brilliant shade of green. The plant is of dwarf habit, with leaves finely cut and very curly. To growers for the market as well as for private gardens we commend this sort. Pkt., 3c; oz., 7c; ½ lb., 20c; 1 lb., 70c.

Extra Double Curled. A fine dwarf variety, beautifully curled; excellent for garnishing. Pkt., 3c; oz., 7c; ½ lb., 20c; 1 lb., 50c.

Plain. The leaves of this sort are plain; it is harder than the curled variety. Pkt., 3c; oz., 7c; ½ lb., 15c; 1 lb., 50c.

Hamburg or Turnip-Rooted. A fleshy-rooted kind; the roots used for flavoring soups. Pkt., 3c; oz., 7c; ½ lb., 15c; 1 lb., 50c.

PARSNIP.

Our Packets of Parsnip contain on the average about 1500 Seeds.

Hollow Crown. We believe this is the finest stock of Parsnip that can be procured. The roots run of uniform size, and are smooth. The growing taste for this delicious vegetable will make this improved strain particularly desirable. Pkt., 3c; oz., 7c; ½ lb., 15c; 1 lb., 50c.

Long Smooth. A fine flavored variety. Pkt., 3c; oz., 7c; ½ lb., 15c; 1 lb., 40c.

Early Round. An early variety, but of small size. Pkt., 3c; oz., 7c; ½ lb., 15c; 1 lb., 50c.

To Market Gardeners.

Market gardeners as a rule send away from home for their seeds.

Our orders from distant cities are increasing in number and size each year, and this of course gives us great satisfaction. We are best pleased however to be able to state that we know and hold the trade of the best gardeners of our own town.

Such expressions as those of Mr. Busch (page 9) and of Mr. Reeves (page 39) are but a type of many we could and would be glad to print, did space admit.

Top Onion Set.

PRICES (subject to market changes). If wanted by mail add 10 cents a quart for postage. Pk's, at bu. rates.

Once set out and established, Egyptian sets come up year after year. Will stand any climate and furnish the earliest green onions.
SEED PEAS.

Northern Grown Seed Peas are earliest, hardiest, most productive, and we make a speciality of them. The level fields of the Northwest produce crops of a uniformity unknown in other pea growing sections. Our crops are thoroughly "rogued" while growing. Samples are fine, free from the pea weevil and thoroughly handpicked.

PRICES. In order to encourage purchases from large planters who live at distant points, we have made exceptionally low prices. Freight rates named on application. Note also, that pints are supplied at quart prices. Pecks and half bushels at bushel prices. No charge for bags. Do not overlook that as our quart prices include postage, 15 cents a quart—ie a pint should be deducted if sent by express or freight at purchaser's expense.

**FIRST EARLY PEAS.**

Our Packets of Peas contain on the average about 150 Seeds.

One quart will plant about 100 feet of drill. One and one-half bushels to the acre.

MAIN CROP PEAS.

Shropshire Hero. Height, 3\% ft. Seeds green, wrinkled. Very productive; quality fine; both pods and peas are very large. Large pkt., 5c; qt., 35c; bush, $3.00; 10 bush, $2.75.

Champion of England. Height, 4 ft. Seeds green, wrinkled. Worthy of continued use not only on account of its fine quality, but from the fact that from it has sprung the whole race of green wrinkled peas. Large pkt., 5c; qt., 35c; bush, $2.50; 10 bush, $2.25.

White Marrowfat. Height, 4 ft. Seeds white. Productive, but in quality rather inferior. Large pkt., 5c; qt., 30c; bush, $2.00; 10 bush, $1.00.

Prince of Wales. Height, 3 ft. Seeds large, yellow, wrinkled. A bushel of pods will give about twice the quantity of shelled peas of any other sort. Quality unsurpassed. Large pkt., 5c; qt., 40c; bush, $4.00; 10 bush, $3.50.

Black Eye Marrowfat. Height, 4 ft. Seeds white, with a black eye. Very hardy, but of indifferent quality. Large pkt., 5c; qt., 30c; bush, $2.00; 10 bush, $1.60.

Sugar Peas—Edible Pods. Giant White. The best of the edible podded varieties. Large pkt., 5c; qt., 40c; bush, $4.00.

Admiral. Height, 3 ft. Seeds admirably small. Pods abundant. Good flavor. Excellent for canning. Large pkt., 5c; qt., 40c; bush, $3.00; 10 bush, $2.50.

Yorkshire Hero. (Big Gem) Height, 1\% ft. Seeds large, yellowish green, wrinkled. Quality fine. Large pkt., 5c; qt., 40c; bush, $3.50; 10 bush, $3.25.

Everbearing. Height, 3\% ft. Seeds large, green, wrinkled. Continues long in bearing. Excellent for family use. Large pkt., 5c; qt., 35c; bush, $3.00; 10 bush, $2.50.

Stanley. Height, 1\% ft. Seeds green, large. Quality delicious. Cross between American Wonder and Ten Thousand. Seeds large. Large pkt., 5c; qt., 45c; bush, $4.50; 10 bush, $4.00.

Hereina. Height, 3 feet. Seeds large, green, wrinkled; enormously productive; splendid quality; pods large. Large pkt., 5c; qt., 45c; bush, $4.50; 10 bush, $4.00.

Telegraph. (Long Island Mammoth) Height, 3\% ft. Seeds quite smooth; pods large; quality excellent. Large pkt., 5c; qt., 45c; bush, $4.50; 10 bush, $4.00.

Duke of Albany. (American Champion) Height, 3\% ft. New, large, green, wrinkled. Very productive and of finest quality. Large pkt., 5c; qt., 45c; bush, $4.50; 10 bush, $4.00.

Palmers Bush, Morris, Minn.

Having raised your "Shropshire" Peas for several successive years, in large orders, and found them almost if not quite the earliest and altogether the most uniform, persistent and productive bearers cultivated in either of these localities.

W. F. HOWELL, Southampton, N. Y.

To Our Customers. WE WANT SOMETHING BESIDES YOUR MONEY. We ask your co-operation in our efforts to supply first-class seeds at the lowest possible prices. You can aid us and aid others in three ways: 1st. By reporting to us the results of seeds you buy from us, whether satisfactory or not, stating particulars as far as possible. 2d. If our seeds please you, by informing your friends. We shall be glad to send our catalogue to any whose names you may find it convenient to send us. Many Seedsmen expend from Ten to Twenty Thousand Dollars yearly in advertising their catalogue. We believe that the best advertisement is a satisfied customer. 3d. By criticising our catalogue and telling us how, in your judgment, it can be made more effective. We shall greatly appreciate your friendly criticisms.
PEPPER.

A WORD ABOUT PRICES.

In purchasing an article of clothing, purchasers can examine its texture, and satisfy themselves as to its quality, and there are tests which will determine the value of every article of merchandise. Except SEEDS, for which the only test is that of time. Frequent advantage is taken of this by seedsmen, to ask unreasonable prices for their seeds. We will ask you to BEWARE OF CHEAP SEEDS, whether sold at ridiculously low or ridiculously high prices, for they are as much humbuggery in the one case as in the other. By GOOD SEEDS at Fair Prices, we mean the Best Seeds obtainable at prices that are fair to the purchaser and to the seller.

"GOOD SEEDS NOT PART OF THE TIME, BUT ALL THE TIME."

Mr. Reeves is one of the principal gardeners of Minneapolis, in addition to his outdoor crops he owns and operates 7 large Green Houses, all of which are devoted to vegetables, except his Pansy House. From this he markets each year several hundred thousand pansy plants (grown by the way from our Imperial German Strains which those who have used it consider unequalled for beauty and diversity of color and marking).

RADISH.
French grown seed make solid Radishes—Our packets of Radishes contain the average about 900 Seeds—A light, quick, rich soil is best for Radishes.

GENUINE STOCK

TOMATO. Early Minnesota. We cannot claim the honor of having originated this Tomato, but early appreciating the great value of a Tomato as early as this, and which at the same time possessed the good qualities of the later sorts, we have devoted every attention to still further developing its excellent characteristics, so that we think we may justly claim possession of the best stock of this sort in existence. We consider it superior to the Imperial, Ruby, or Early Michigan in points of shapeliness, color, smoothness, solidity and flavor, while for EARLINESS it is not approached by any good Tomato. Large pkt. 10c, Oz. 25c, ¼ lb. 75c, Lb. $2.50.

Our packets of Tomato contain on an average about 1,400 Seeds.

Dwarf Champion. Leads all others in point of productivity; foliage very distict; color, purplish pink; flesh solid, early; fine quality; on account of its habit of growth, vines may be planted 3x3 ft., or even more closely.

Atlantic Prize. Very early, smooth, bright red and solid.

Early Ruby. Very early, similar to Atlantic Prize.

Early Michigan. Early, heavy cropper, deep rich color, excellent flavor.

Imperial. Very early, large, smooth, light red; fine quality.

Optimus. Good cropper, color crimson scarlet.

Matchless. Large, smooth, handsome, bright red, solid.

Ponderosa (true stock). Largest variety grown.

Cardinal. Bright red, glossy, solid, good size.

Perfection (Livingston). Early red, productive.

Favorite (Livingston). Good shipper.

Beauty (Livingston). Pinkish red, thick flesh.

Stone (Livingston). Large, smooth, very solid, bright scarlet.

Ace. Red, purplish at stem end; popular.

Bayley's State (Livingston). Beef color, a little later than Beauty. Start plants early and stake up for early use.

Turner Hybrid. Large, smooth, solid, purplish red.

Royal Red (Livingston). Intensely red color, smooth, large, not a good shipper.

Trophy. Solid, late, large.

Yellow Plum. Used for pickles; bright yellow.

Large Pkt. Oz. ¼ lb. Lb.

Peach. Much resembles a peach in appearance. The skin is thin and peels off like that of a peach; quality excellent.

Lovillard. Best for forcing, excellent for out-door cultivation, early, red, smooth.

Red Cherry. Fruit small, used in pickling.

Yellow Cherry. Fruit small, used in pickling.

SNOW WHITE. Dwarf stock. Used for forcing. Early development. Large Pkt. 10c, Oz. 25c, ½ lb. 75c, Lb. $2.50.

Strawberry or Winter Cherry Tomato.

Large Pkt. Oz. ¼ lb. Lb.

Red Currant. Small fruit, used in preserves.

Strawberry (Winter Cherry or Husk).

Aristocrat. This is practically a red variety of Dwarf Champion.

Crimson Cushion. Fruit very large, bright scarlet, solid, stands shipment well.

Golden Queen. Rich deep yellow.

"Your EARLY MINNESOTA TOMATO is the earliest Tomato I have ever tried."—A.L. Anderson, Hallock, Minn.

"EARLY MINNESOTA TOMATO are the best Early Tomato I ever saw. They ripen early, bear well, and are of fine flavor."—Henry Failing, Sedalia, Col.
TURNIP—Table Sorts.

Our Packets of Turnips contain on the average about 3,500 Seeds.

White Strap Leaf. An excellent early sort.

White Norfolk. Late, one of the best table sorts; excellent also for stock feeding.

White Globe. (Large) Sweet, good keeper.

Green Globe. Very large; white flesh.

Yellow Globe. Firm, sweet and handsome.

Scarlet Kashmir. A new and distinct variety; the outside skin is of a beautiful deep scarlet color; flesh white, very early and of the finest table quality.

TOBACCO.

Connecticut Seed Leaf. A largely cultivated sort in America.

Pennsylvania Seed Leaf. Widely known and used. Our seed is from the famous Lancaster county district.

Havana. Genuine Cuban strain. From the celebrated plantations of the "Vuelto de Abajo".

Conqueror. A vigorous growing variety of finest texture. Early and easily cured. Our stock is direct from Mr. Ragland, the originator.

Sterling. The brightest of the yellow type, and being the earliest to ripen, is surest in localities liable to early frosts.

Hester. Yellow type, makes fine cigar stock. It has size, shape, texture and color, and ripens early. It recommends itself greatly in this, that it is liable to be grown. A variety of intrepid ability over a wider range of soils and latitude than any other of the yellow varieties, and may, on this score, be considered the surest.

Sweet Oronoco. Used for first-class plug fillers, and makes, when sun cured, the best Natural Chewing Leaf. A favorite for the "Homespun" wherever known. Known as Little Oronoco in some localities.

AMERICAN COFFEE BERRY.

(Soya Bean.)

While nothing quite takes the place of good old Java or Mocha Coffee, the Coffee Berry, when used alone, makes a healthful, pleasant and economical beverage, with a strong coffee flavor, and quality superior, in our estimation, to the many coffee substitutes now on the market. When blended and ground with good coffee, half and half, its presence can scarcely be detected. It is prepared just like coffee. The beans, which are about the size of the real coffee berry, are roasted, ground, and used either alone or mixed with coffee, as may be preferred. The plant, which takes from four to four and one-half months to mature, is about three feet in height. It fruits from the ground up, and on the limbs in every direction. The pods, of which there are from 10 to 20 on a plant, touch each other, so closely together do they grow. The pods contain on an average from two to three beans, of the shape and size shown in the illustration.

CULTURE. The rows should be planted three feet apart, one berry every ten inches apart in the row. Cultivated like corn or beans, and should be planted about the same time. PRICE. Large pkt., 10c; ¼ lb., 25c; ½ lb., 75c; 1 lb. & 25c, by mail postpaid. Special prices in large quantities.

Our "STERLING" Lawn Grass Seed makes Perfect Lawns.
HERBS.

Utilize the corners for a few Pot and Sweet Herbs (for flavoring soups, meats, etc.) indispensable to every garden, while Medicinal Herbs will be found useful. Thrive nicely along sunny side of fence, in a deep, fairly rich soil.

ARTICHOKES ROOTS.

The New Large Jerusalem Variety; producing from 400 to 1000 bushels per acre. An excellent food for cattle and hogs. Fed to milk cows they are for the production of milk, equal if not superior to bran. But their greatest value is for food for hogs. Even the labor of feeding is avoided, as the hogs will help themselves if allowed to do so. We consider them the cheapest and healthiest hog food possible to raise. And find that when brood sows have free access to Artichokes, and their pigs invariably do well. There is no better food to build up large, healthy frames, with plenty of bone and muscle. Hogs will not only grow, but fatten on them.

On good land, with the same culture as corn, Artichokes will produce from 400 to 1000 bushels per acre. A.C. Williams, of Iowa, a very prominent breeder of Poland, Chinas, says: "Forty head of hogs and pigs may be kept without other food on an acre of Artichokes from the time frost is out of the ground until the first frosts again, and from October 1st until the ground freezes again. They produce more hog food per acre than any other crop I am acquainted with, and the hogs will harvest the crop themselves. Artichokes also produce an immense quantity of tops, of which catch Frit., cheese, and much that are very fond, and which makes excellent food when properly cured. A chemical analysis of roots shows them to be superior to Carrots, Parsnips, Mustard, and at times the same as turnips."

PLANTING, CULTURE, PRICE, ETC. Artichokes need planting but once, and little or no culture after the first year. Cut as potatoes, only smaller; plant in rows three and one-half feet apart. Plow deep, plant shallow, say two inches; the second year, break up the ground as for corn; will come up thick all over the surface. Run through each way with a cultivator when a few inches high. Prices, 1 lb. 30c; 4 lbs., $1.00, by mail postpaid. By freight or express: ½ bu., 75c; 1 bu., $2.00; barrel of 3 bu. for 1 acre, $6.00.

ASPARAGUS ROOTS.

By far the most satisfactory way to obtain an Asparagus bed is to set out the roots. We send out no roots that are less than two years old. They may be sent by express or freight, with the assurance that they will arrive in perfect condition for planting. Asparagus Roots are sent only by Express at purchaser's expense. They are warranted to reach destination in good growing condition.

Northrup, King & Co., Seed Growers, Minneapolis, Minn.
Some New Flowers.

N., K. & Co.'s STARRY FLAG Sweet Pea collection, postpaid, only 10 CENTS.

This collection consists of three packages, each containing 100 SEEDS of, FIREFLY, the best red (or scarlet), PURITY, the best white, and CAPTAIN OF THE BLUES, the best blue Sweet Pea. Firefly ranks foremost among all the brilliant scarlets. Flowers are of large size. Stems are three feet long and of good length. Purity is the purest of all the white varieties, as it does not take on the pinkish hue often found in white varieties that are otherwise desirable. The flowers are large and finely formed, while the stems are long and stiff. Captain of the Blues is a large and very free flowering variety, producing 5 or 6 blooms on good stems.

THREE HUNDRED SEEDS of These Beautiful Sweet Peas for only 10 CENTS POSTPAID.

IRISH SHAMROCK.

There are many who will be glad to obtain seeds of the True Irish Shamrock, the National Emblem of Ireland. The seed has been difficult to obtain, even in Ireland, and it is necessarily somewhat high in price. That which we offer is obtained from an Irish Seedsmen, through a well known Philadelphia house, and is represented to us to be true stock of this historic plant. Pkt., 10c; 3 pkts. for 25c.

CROTALARIA RETUSA.

This striking novelty was last year offered by various Seedsmen under the name of Golden Yellow Sweet Pea, Dwarf Golden Sweet Pea, etc., and, while the blossoms are a true Sweet Pea form, flowers of a brilliant yellow coloring set off by a blotch of maroon on the wing, here the resemblance to the Sweet Pea ceases, as the plant has no tendrils and requires no support. It is a strong, deep-rooted bush, growing about two and one-half feet high, and able to stand alone. It is an annual, blooming early and continuously until killed by frost in the fall. A field of plants is a perfect sheet of gold. A bunch of these flowers placed in water, or mingled with Sweet Peas, form a rich effect and last a long time. As a pot plant, nothing can be more beautiful, while for out-door planting, either with other annuals or massed in a bed, nothing can be more effective. Our seed is obtained direct from the introducer, Miss Florence Gill. Price, per large pkt., 5c; 3 pkts for 10c.

MOUNTAIN ROSE.

This magnificent climber is one of the most distinct and valuable acquisitions of recent years. Like Ampelopsis Veitchii, it is freely furnished with long tendrils that attach themselves firmly to stone, brick or wooden walls. It grows with the greatest rapidity and soon covers a large area. Being a native of Montana, it is absolutely hardy and can adapt itself to any soil, locality or exposure. It covers posts, pillars or verandas with a uniform mat of heavy green foliage, which in autumn changes to brilliant crimson. With its gorgeous carmine flowers, which are borne in greatest profusion, a well-established plant of this splendid novelty is a sight to behold. Our customers will miss a rich floral treat if they do not secure the Mountain Rose. Pkt., 10c; 3 pkts., 25c. Be sure and order early, as our stock is limited.
Poppy Anemones (A Charming Novelty).

ST. BRIDG (OR POPPY) ANEMONES. Nothing could be more glorious than a bed of these new Irish Poppies when in flower. It might well be compared to a kaleidoscope picture, glistening with and reflecting thousands of bright colors; or to some bright oriental carpet, whereon the artist has exercised his ingenuity to blend pleasing and decorative colors. Indeed, the flowers produced by this new strain show all the colors of the rainbow and many more; for even black and white are found among them, as well as shades of pink, rose, crimson, fiery scarlet, carmine, maroon, tints of lilac, lavender, blue, purple, and even green. Many flowers are curiously mottled, striped, edged, ringed and shaded with the various tints described above, the effect produced being almost bewildering. They are also frequently of very large size, even 5 to 6 inches across; some single, but most double, with plain, scalloped or fringed edges.

Sown early and planted in the garden in rich soil, they will bloom profusely and frequently until well after frosts have cut down other tender plants; and, being perfectly hardy, they will bloom again the next season in greater profusion than ever. For cutting they are unsurpassed, as the flowers and the beautiful fern-like foliage remain fresh in water for a week or more. The plants can be lifted in the autumn and bloomed in the house for Easter decoration. Pkt., 10c; 5 pks., 25c.

CHINESE TEA PLANT. The seed we offer is that of the true Chinese Tea Plant, the Tea of Commerce, the leaves of which we drink. The plant, which attains the size of currant bushes, is an evergreen producing glossy leaves somewhat resembling the orange. The flowers are small, in clusters, with yellow centers, and are very beautiful. The large seed pods are also very ornamental.

This useful plant is hardy south of 40 degrees. North of that it should be grown indoors in pots or tubs. The grower in Louisiana from whom we secured our seed, and who, by the way, is a lady, writes us: "We have the finest kind of Tea trees in our garden. I am sure they would compare favorably with any in Asia. We like the home-raised tea much better than store tea, and then we know it has not been dried or handled by lepers. Four crops are gathered in a season, the first and second being the best, especially the first. This is made from the tender leaf buds before they have expanded, and is very expensive when purchased. It is used by the Emperor of China, and perhaps by other rich people, but not, as a rule, by ordinary mortals. You may say to your customers that six plants will produce sufficient tea for a family that they can be grown in pots in the house, and are very much prettier than Oleander, Cape Jasmine or Orange trees, besides being rare and useful."

General Le Duc, Commissioner of Agriculture under President Hayes, recently informed us that he drank American grown tea exclusively, and considered it very superior to the tea to be found in stores. We hope that many will see what they can do with this interesting plant. Price, per pkt. of 5 seeds, 15c; 2 pks., 25c. The seeds are very large, about the size of a small chestnut.

BIRD OF PARADISE. The color of the flower is a golden yellow, measuring two and a half inches across, with shape as shown in illustration, and are produced in very large trusses. The most beautiful part of the flower is the large pistils, which are spread out in fan-like form, and are of bright crimson color. The foliage is also highly decorative, reminding one of a very delicate Acacia. If the seed is started early it will produce blooms in great profusion the first year. Pkt., 5c.

CAPE FUCHSIA—Phygelius Capensis. Plants barely a few inches high bear from 10 to 20-bold, long spikes, completely crowded with showy scarlet, drooping flowers, persistently produced from May until late autumn, when they can be brought in for winter blooming. It is also a good bedding plant, grown singly or in masses. The seed should be sown in a slight hotbed early in the spring, and the seedlings afterwards transplanted to a warm, sunny position. Pkt., 10c.

ORANGE DAISY. A beautiful perennial plant somewhat resembling an Aster, but having the ray flowers in several rows; flower heads flat, about two inches across, bright orange color on strong, stout stems. They are of very easy culture in common garden soil and form excellent subjects for mixed borders. In a moist, well-drained situation, will flower the first season if started early in the house. Pkt., 5c.
Select List of Flower Seeds.

FREE PREMIUMS.

An order for FLOWER or VEGETABLE SEEDS in PACKETS to the amount of 75 CENTS, entitles the purchaser to one full size package of our SCHOOL GARDEN FLOWER MIXTURE; an order for $1.50 to 3 packets, with the privilege of competing for the $150.00 CASH PRIZES OFFERED BY US. See Colored Insert for full particulars.

Our list of Flower Seeds embraces all the popular and easily grown varieties, as well as the best novelties of recent introduction. It will be noted that all along the line we have made radical reductions in PRICES, and, in so doing, we have sacrificed neither quality or quantity. Our Flower Seeds are the finest obtainable.

Our Packets, we believe, contain MORE SEEDS, in proportion to price asked, than those put out by any other house.

We greatly regret that we cannot illustrate every one of the beautiful varieties we list. Prominence is given to a few leading sorts, but many to which but a few lines are given are equally worthy of display.

Group of ASTERS from Northrup, King & Co.'s IMPERIAL MIXTURE:

This mixture embraces all the new and fine varieties. (See description.)
CARNATION. (Carnation Bells.) Single Mixed. Pkt. 3c
A popular perennial producing bell shaped flowers of many colors freely throughout the summer.

CANTALOUPE FLOWERS. A hardy annual. Foliage bright green, flowers golden yellow.

ENTAUSEA MARGARET. (New). One of the most valuable introductions of late years. Flowers are pure white, sulphur yellow and lavender. Sweet scented and lasting, valuable for cutting. From seed sown in the spring will flower until late in the autumn.

CINERARIA. The flowers possess a depth of color peculiar to themselves. Large flowering, best Mixed.

CHINESE LANTERN PLANT. The plant produces numerous, large, inflated husks, much the shape of Chinese lanterns, at first a beautiful green color, changing to a yellowish hue then to brightest scarlet, and as they hang suspended among the green foliage they present a most novel and strikingly beautiful appearance. Branches cut and dried retain their rich and brilliant color, and make most beautiful winter bouquets when used with dried grasses or leaves. The plant grows from one and one-half to two feet in height. Treated as a pot plant it grows and fruits freely from seed the first season, yet the plants are perennial and may be wintered in the cellar or grown in pots as a winter plant.

CHRYSANTHEMUM (French Marguerite) Annual. Much grown for cut flowers. Perennial, Fancy strain. Seeds must be started early to bloom the first summer.

CLEOME PUNGENS. (Giant Spider Plant) A perpetual bloomer. The flowers very showy; bright rose color, and blooms freely all summer.

COCKSCOMB. (Celosia) Queen of Dwarfs. The best variety. Flowers are of a rich, ruby red, and of extreme brilliancy.

COBAEA SCANDENS. (Climber) Does well both indoors and in open ground. Flowers are large, bell shaped, green at first, but later change to a beautiful deep violet blue.

COLEUS. A well known foliage plant. Easily grown from seed. All colors mixed.

COSMOS, Dawn. The great new general cultivation of the Cosmos in the North has been its lateness. Frost usually cutting them down just as they were coming nicely into bloom. The Grand New Cosmos Dawn will bloom in July from seed sown in spring. It has another advantage in being more dwarf than the other varieties. Height about four feet. Flowers are white, rose tinted. Seed sown early and transplanted to open ground will produce plants covered with bloom until late. Pkt 25 seeds.

White. Flowers large, pure white.

Pink. Beautiful. All colors mixed.

Pure Yellow. New and striking.

Finest Mixed. All colors.

CYPRESS VINE. A delicate vine. Flowers star shaped, scarlet and white. All colors mixed.

DAIS. Double. Flowers white, pink and variegated. Finest Mixed.

Snowball. Flowers white, with long stems; nearly all double.

DAHLIA. Double. Easily grown from seed. Flowers the first season.

New Striped Single. Beautifully marked.

Datura. Trumpet Flower. Flowers large, fragrant. Finest mixed.

DIANTHUS. (Chinese Pinks) All colors, shades and markings, single, fringed and double. Unsurpassed, finest mixed.

Good mixed.

Snowball. The flowers white and double.

EGLANTIA. (California Poppy) Flowers large, rich golden yellow.

FEVERFEW. Double. A fine old fashioned plant, valuable in any garden.

FORGET-ME-NOT. Blue, very pretty.

FUCHSIA. Easily grown from seed. Will flower first year in open ground. Finest varieties, double and single, mixed.

New Cape. Desirable new sort, crowded with showy scarlet drooping flowers.
Marguerite Carnations. New Giant Flowering.

This magnificent race of Carnations flowers in a few weeks from seed sown in the spring. (See description.)

**GAILLARDIA.** Showy, fine for bedding. New, Double, Finest colors mixed .......................... 3c

Single. Finest mixed ........................................ 3c

**GERANIUM.** Started early, this favorite flower can be produced from seed and will flower the first season. Finest mixed ................................................................. 12c

Good mixed ...................................................... 5c

**GLOXINIA.** Makes magnificent pot plants. Will bloom three months after seed is sown. A great array of beautiful colors. Finest mixed ......................................................... 12c

**GODETHIA.** Beautiful hardy annual; flowers large, delicate and of varied colors. Finest mixed ................................................................. 3c

**HELOIFROPE.** Seeds sown in the spring makes fine plants for bedding; are as easily grown as Verbena. Finest mixed ................................................................. 8c

**HELICHRYSUM.** The most popular everlasting; many colors. Finest mixed ................................................................. 8c

**HOLLYHOCK.** Chater’s finest strain. Perfectly Double. Flowers all conceivable colors. The finest strain of Hollyhock grown. If sown early the plants will bloom the first year. Common mixed ................................................................. 15c

**ICE PLANT.** Handsome and curious. Adapted for basket and rock work. The leaves and stems appear to be covered with icy crystals ................................................................. 3c

**LANTANA.** Well known shrub plants with clusters of verbenalike flowers of different colors. Finest mixed ................................................................. 5c

**LARKSPUR (Delphinium).** Annuals of great beauty and rich colors. Finest mixed ................................................................. 5c

**LILY OF THE VALLEY (Convallaria).** ................................................................. 20c

**LINARIA (Keniworth Ivy).** A hardy perennial trailing plant for rock work and hanging baskets ................................................................. 4c

**LOBELIA (Royal Purple).** An elegant plant of easy culture, adapted for bedding, edging, etc. Rich purple in color ................................................................. 5c

**EL Dorado.** All shades of yellow ................................................................. 3c

French. Mixed. All the finest colors; very showy ................................................................. 3c

**MARVEL OF PERU.** (Four O’clock). Handsome flowers of great variety. Finest mixed ................................................................. 5c

**MIMOSA.** (Sensitive Plant). An interesting and curious plant. The leaves close and drop at the slightest touch ................................................................. 8c

**MIMULUS.** (Monkey Flower). Flowers are singular in shape and of many brilliant colors, blotched and spotted. Finest mixed ................................................................. 3c

**MIMULUS MOSCHATUS.** (Musk Plant). So named on account of the musky odor of the plant ................................................................. 3c

**MORNING GLORY.** Imperial Japanese. This beautiful new strain of Morning Glories must be seen to be appreciated. No description can do them justice. The flowers measure from 1 to 6 inches across; the colors, tintings and markings are of incomparable beauty. Some flowers are of solid colors, others are striped, starred and spotted, while others have magnificent edges and throats. The vines are of robust growth, attaining a height of 30 to 50 feet. The foliage too is very beautiful, some of the leaves being green, others yellow, and still others mottled and checkered. Single and double, mixed ................................................................. 5c

**Convolutus.** (Major). The common Morning Glory. All colors mixed ................................................................. (oz., 8c)

**MIGNONETTE.** Sweet. The most fragrant variety ................................................................. (oz., 8c)

**Golden Queen.** Flowers are of golden hue and fragrant ................................................................. 3c

**Marvel White.** Pure white; quite showy in growth; not fragrant ................................................................. 3c

**NASTURTIUM.** — **DWARF MIXED.** N. K. & Co.’s Imperial. In this mixture is represented almost every known variety. It is made up by ourselves from named sorts. For variety of markings and brilliancy of coloring it has no superior. (oz., 1.5c; 2 lb, 40c; lb., $1.25) ................................................................. 7e

Dwarf. Good mixed. This is an excellent mixture, but does not contain as many varieties as all of the more expensive sorts found in our Imperial Mixture. (oz., 8c; ¼ lb, 25c; lb., 75c) ................................................................. 3c

**Brilliant Dark Scarlet** ................................................................. (oz., 30c) 8e

**Double Dahlia.** Easily grown from seed. Flowers first season.
New Japanese Flowering Glory.
The flowers are large of incomparable beauty, and of almost limitless variety of shadings, colorings and markings. (See description.)

Canary. Beautiful, pure yellow (oz., 30c) 8c
Chesnut. Brown, very rich (oz., 30c) 8c
Spitfire. Brilliant scarlet (oz., 30c) 8c
Giant of Battles. Sulphur, spotted with red (oz., 30c) 8c
Lady Bird. Golden yellow, barred with crimson (oz., 30c) 8c
King of Blacks. Very dark, almost black (oz., 30c) 8c
Madame Gunther. The new climbing Nasturtium. A new section obtained by artificial hybridizing, and distinguished by dark-colored foliage and flowers of a richness and variety of coloring not to be found in any of the different classes of Nasturtiums heretofore grown. Colors in these new hybrids include various shades of rose, salmon, bright red, pale yellow, etc., either self-colored or spotted, mottled, striped and margined oz. 2c, ½ lb. 6c; lb. $2.50
Lob's Climbing Tall. Those should not be confused with the common tall Nasturtium, as they surpass them by far in the remarkable brilliancy of the flowers. Finest mixed (oz., 30c; ½ lb. 75c; lb. $2.50) 10c
Tall. Capital mixture, but the flowers do not possess the brilliancy and depth of coloring of the Lob's Nasturtium (oz. 10c; ½ lb. 25c; lb. 50c) 5c

ORNAMENTAL GRASSES. Many of these are handsome in growth and all are desirable for winter bouquets, if cut while green and dried in the shade.

PANSY. N. R. & Co.'s Imperial German. Unrivalled for diversity of coloring and marking. This mixture is made up from over 100 of the finest named varieties, grown by Pan- sies specialists of the Old and New World. In the making up of this mixture, expense is not regarded. Our aim is to possess the finest mixture of Pansies obtainable. We have never seen its equal. The diversity of colorings and markings is almost beyond belief. We will cheerfully return money paid for this mixture to anyone who says it is not the finest they ever saw. Pkt. containing 50 seeds, 12c; 100 seeds, 15c; 600 seeds, 30c; 1000 seeds, 75c.
Good Mixed. An excellent strain (oz., $1.50).... 3c
N. R. & Co.'s Giant Fancy. While all the Pansies in our Imperial Mixture are large, we do not include in its make-up many of the Giant sorts, for as a rule many of our customers prefer to buy them separately. Great improvement has taken place within the last 2 or 3 years, however, in the character of the largest Pansies. Our Giant Fancy is the finest mixture of large varieties... 7c
Royal Show. A well known English mixture containing many fine varieties....................... 5c
Fire King. The best Red Pansy known.............. 7c
Snow Queen. Ivory white, with scarcely any discoloration about the eye....................... 4c

Peacock. English variety. Beautiful ultra-marine blue. .............................................. 4c
Golden Beauty. Finest yellow pansy................. 6c
Sweet Scented. The result of crossing the Pan- sy with the Sweet Violet. Flowers are of good size and of endless variety. Quite fragrant... 5c

Nicotiana. Delightfully sweet scented; pure white flowers, blooming continually. 4c

Sweet flagonette.

Large Flowering Petunia.
This strain, with its magnificent range of colors, is a great improvement on ordinary mixtures. (See description.)
PETUNIA. N. K. & Co.'s Extra Large Flowering. Mixed. This mixture embodies all the best varieties and will prove an agreeable surprise even to those who expect much. All odd and notable kinds, black, crimson, white with yellow throat, marble veined, striped, variegated, etc. N. K. & Co.'s Fine Double Mixed. Will produce about thirty per cent of double flowers. Hybrida. Good mixed. Excellent for bedding; shows many colors.

POPPT. PETUNIA. PRIMULA. 50 PRIMROSE. BICINUS. Iceland. Petals Tulip. Richness flowers large form, White is very distinctation. Perennial. Starred not of any kind. Double. One of the finest mixed; very desirable for bedding or border. Hardy...

POPPY. N. K. & Co.'s Imperial Mixed. Single and Double. For great number of varieties, richness and diversity of coloring this mixture is not surpassed. Shirley. Flowers are large; colors varied. One of the finest sorts. Fairy Blush. Flowers are immense. Double. Petals fringed.

FRAGILIS. Grandiflora. Large, flowering. Their richness of coloring and long duration of bloom make them a gratifying feature of any garden. Good Mixed. Colors are excellent, but flowers not as large as preceding. Starred and Fringed. New race of Phlox. Many distinct and beautiful shades. Perennial. Specimen Plants.

PETULACA. Double mixed. Very showy and beautiful. Only about 70 percent, double flowers can be expected from the finest mixtures. Single. All colors mixed.

PRIMULA. (Chinese Primrose.) The colors include crimson, pink, white, maroon, and the new Holborn blue. Our stock is the celebrated Haya & Wetherall strain of seed, costing us at the rate of $1.100 a pound in England. Double. An excellent mixture; all colors.

PETULACA. Double mixed. Very showy and beautiful. Only about 70 percent, double flowers can be expected from the finest mixtures. Single. All colors mixed.

PRIMULA. (Chinese Primrose.) The colors include crimson, pink, white, maroon, and the new Holborn blue. Our stock is the celebrated Haya & Wetherall strain of seed, costing us at the rate of $1.100 a pound in England. Double. An excellent mixture; all colors.

NASTURTIUM. Northrup, King & Co.'s Imperial Dwarf Mixed. In this magnificent mixture is represented almost every known variety. It has no superior. [See description.]

Zanzibariensis. A new Castor Oil Bean from Africa. The plants attain great size. Leaves are enormous, often measuring two feet across. SALFILLOGLOSIS. Grandiflora. Should be found in every garden. Easily grown. Flowers vary in shade from light blue and straw color to deepest purple and richest brown. SCABiosa. (Morning Bride.) Double black. Snowball. Flowers, large, pure white.

SWEET PEAS. N. K. & Co.'s Imperial Mixed. The Finest mixture obtainable. In making the claim that our Imperial is the finest mixture of Sweet Peas obtainable, we are sustained not only by our own experience but by the testimony of a great number of delighted customers who have used this mixture for years. Like our Imperial (German Pansy), it is made up regardless of expense; the aim being to secure in this combination the largest flowering sorts and finest possible range of colors. OZ. 15c; ½ lb. 30c; lb. 1.00c.

N. K. & Co.'s Good Mixed. This is a most excellent mixture, embracing the best standard varieties and all colors. OX. 6c; ¼ lb. 10c; ½ lb. 40c.

A NEW FEATURE IN MIXTURES.

Pure White Varieties Mixed, Includes, Alba Magnifica, Emily Henderson, Mrs. Sankey, Queen of England, Blanche Burpee, etc., OZ. 10c; ½ lb. 25c; lb. 60c; postpaid... Pink and White Varieties Mixed. **Hultiflora Rose.**
True Multiflora or the New Fairy Rose.
They bloom in four months after sowing, so that seed sown in February in the house may be had in bloom in June in the open ground, where they continue to bloom throughout the season, giving about an equal proportion of single, semi-double and double flowers borne in clusters and contain all the tints and colors of cultivated roses. One of the most unique and novel pot flowers now grown. Attracts attention everywhere. The only genuine dwarf variety "Rosa Multiflora." The plants grow about one foot high; very hardy and may be treated as annuals. Pkt. 6c.

**Flammoth Flowering Verbena.**
The largest Verbena known, a single flower often being as large as a twenty-five cent coin. For Garden beds or effective massing, this Verbena is unequalled. [See description.]
Mr. LEBOY N. BROWN.

SWEET PEAS.

Cupid. The new Dwarf Sweet Pea grows but five inches high and blooms so freely as to appear a perfect mass of white. Flowers are of fine form and large size, remaining in bloom quite two months longer than any other sweet pea. 5c.

New Dwarf Sweet Pea. Pink Cupid. Bears generally three and sometimes four flowers to a stem. The flowers are identical with the tall-growing Blanche Ferry and are always fully equal in size. The standard is a bright rose pink, while the wings are pure white or light pink. It will be without a rival as a bedding and border annual, for its color and fragrance make it a rare novelty. The seed we offer was secured directly from the introducer in sealed packets containing 12 seeds. Price 15c. or 2 Packets for 25c.

Emily Henderson. White, flowers large, very early. 7c; ½ lb. 20c.

Firefly. The best of all scarlets. Oz.; ½ lb. 20c.

Gilyot. Crimson stripes on white ground; stems brilliant. Oz. 15c; ½ lb. 30c.

Her Majesty. Large bold flowers of a beautiful rose color. Oz. 10c; ¼ lb. 25c.

Mrs. G. Stone. White, Soft Blush Pink. Oz.; ½ lb. 20c.

Mrs. Joseph Chamberlain. Striped; bright rose on white. Oz. 10e; ¼ lb. 35c.

Mrs. Sankey. One of the finest white varieties. 8c; ½ lb. 20c.

Primrose. The nearest approach to a yellow sweet pea. Oz., 8c.

Red Ridinghood. Hooded form. Oz. 20c.

Stanley. Rich dark maroon. The finest dark variety. Oz. 10c; ½ lb. 20c.

Venus. Large expanded form. Color rich salmon buff. Oz. 10c.

SOLANUM. (Jerusalem Cherry,) Miniature Orange Tree. Fruit scarlet. Beautiful.

STOCKS. Large Flowering Two Weeks, For cut flowers, both on account of diversity of color and fragrance.

SFECK, Evening Scented. Nothing delights us in delicately perfumed flowers as the Pkt pink and lilac blossoms partly close during the day, but expand and impart their fragrance in the evening. 3½c.

SWEET WILLIAM. (Dianthus Barbatus,) Hardy perennial. Mixture of many colors and varied markings. 3½c.

THUNBERGIA. (Black Eyed Susan.) A very elegant climber. They flower all summer. Best mixed. 3½c.

MAMMOTH VERBENA. The largest Verbena known, a single flower often being as large as a twenty-five cent piece. For garden beds or effective massing the verbena is unequalled. They bloom profusely the first year from seed, the flowers lasting until late in the autumn. Our mixture is made up of the most brilliant colors. Large pkt. (about 60 seeds), 5 cts.; 3 pkts., 12 cts.

Verbena Hybrida. The flowers are smaller, but the colors are very fine. Large pkt., 3c; 4 pkts., for 10c.

Verbena, Lemon Scented. This fragrant plant is easily grown from seed, and succeeds well anywhere. Have a good bed of it in the garden over summer, Pkt. that you can cut its fragrant foliage and flowers, to make up with bouquets.

3 pkts., 12c.

Verbena, Pure White. A fine strain of large flowering, pure white Hybrid Verbena; trusses large and borne freely at all times; comes true from seed. 3 pkts., 12c.

VINCIA ROSEA. A free flowering perennial, with glossy green foliage and beautiful circular flowers of a fine rose color. If sown early under glass, and transplanted in a warm situation, blooms in summer and autumn. 3 pkts., 12c.

VIOLET. The violet should not be wanting in any garden, on account of its fragrance and early appearance. A single flower will perfume a room. Hardy perennial. Finest mixed. 5½c.

ZINNIAS. Giant Mammoth. A superb new strain. Zinnias, giant in size, and perfectly double flowers of richest, most varied colors and shades. Plants growing 3 ft. high, blooming freely during long period; particularly valuable for groups. Choice mixed.

Double Lilliput. Dwarf, compact bushes, with very small, perfectly double flowers of brightest colors... Zinnia. Choice double mixed

Salpiglossis. Should be found in every garden. Variety-called green by the Japanese Morning Glory is its marvelous display of color. [See description.]
SUMMER FLOWERING BULBS FOR SPRING PLANTING.

For this list we have selected those bulbs, which while inexpensive are most beautiful and most easily grown. Their culture is simple, and most of them flower the first summer. The bulbs may be kept over winter and will continue to multiply, year after year. A small investment in any of these bulbs will well repay the purchaser.

PLEASE NOTE CAREFULLY. All bulbs and roots will be sent by mail or express, charges prepaid, when ordered at single or doz. rates. At the 100 rate they will be sent by express or freight, the purchaser paying the charges, unless otherwise stated. Not less than six of any one variety supplied at doz. rates, and not less than 25 at the 100 rate. Orders with money should be sent as early as possible, and they will be filled in rotation. Bulbs subject to injury by frost will not be sent until such danger is over.

CULTURE. Plant as soon as frost is out of the ground, in fine rich soil, mixed with sand. Set the bulbs from 3 to 5 inches deep, according to size. No water should be allowed to stand around the roots. Once firmly established, they will stand for years.

Lilium Auratum. (The Golden-Rayed Lily of Japan). Flowers are immense, 10 to 12 inches across, very fragrant, color: very white, studded with crimson spots and a bright golden band through the center of each petal. Bulbs 15c; 2 for 25c; doz., $1.30.

Lilium Rubrum. The famous "Ruby Lily" of Japan. It would be difficult to exaggerate the beauty of this glorious lily. The six broad petals dotted with carmine spots. Very fragrant. Bulbs 15c each, 2 for 25c; doz., $1.30.

Lilium Longiflorum. The pure white flowers resemble the well known Bermuda Easter Lily and are very fragrant. 15c each, 2 for 25c; doz., $1.25.

Lilium Tigrinum, splendens (Improved Single Tiger Lily). Has very large flowers of excellent form; color, orange-salmon with dark spots. 15c each, 2 for 25c; doz., $1.25.

Lilium Tigrinum, flore pleno, (Double Tiger Lily). This magnificent lily is of stately habit, bearing clusters of very large double flowers on tall, strong stems; color, bright orange-red, spotted with black. 15c each, 2 for 25c; doz., $1.25.

Jacobean Lily (Amaryllis Formosissima). The brilliant deep scarlet flowers are often eight inches across and in purity and brilliancy of color are unsurpassed. 15c each, 2 for 25c; doz., $1.25.

GLADIOLUS.

On account of its intrinsic merit alone, the Gladiolus is entitled to the high rank it holds among flowers; but when is considered, also, how easy is its culture, and for what a small sum a splendid assortment can be secured, it seems a matter of surprise that they are not found around every home. The flower is most beautiful and lasting, and the infinite variety of color and marking render their cultivation very interesting.

CULTURE. They thrive in almost any good soil, except a stilly clay, require full sunlight, and are only liable to injury from rank grasses. Plant the bulbs six to nine inches apart, the large ones four inches and the small ones two inches deep. Make an early planting of the smallest bulbs first as soon as the ground is sufficiently dry and warm. Continue to plant at intervals of two weeks during the spring and early summer; in this way a succession of bloom may be had from midsummer until frost. In autumn, before freezing they should be dug and dried, the earth and old bulbs removed, and then stored in a cool dry place, secure from frost until spring.

N. K. & Co.'s Imperial Gladiolus Mixture. Those who have had this mixture know it to be a grand one. For many years we have been adding to it from the new and high priced varieties as they made their appearance, and we mean it to include every desirable sort. It has been our experience that comparatively few who buy the named varieties. So we have made a specialty of our Imperial mixture and the plan adopted in their growth by which they are cultivated much like potatoes or corn enables us to offer them at a price ridiculously low compared with what is asked for them ordinarily. At these prices they should go like hot cakes. 4 for 10c; doz., 25c; per 100 $1.30, postpaid; by express or freight, per 100, 90c.

Gladiolus Mixtures.

These mixtures must not be confounded with the common mixed sorts. We recommend this stock with perfect confidence, as it is composed only of choice varieties. Single and doz. prices include postage. The 100 rate is by express at purchaser's expense.

Shades of pink mixed, each, 3c; doz., 30c; 100, $1.75.
Shades of red mixed, each, 3c; doz., 20c; 100, $1.00.
Shades of Yellow mixed, each, 4c; doz., 40c; 100, $3.50.
White and light varieties, each, 4c; doz., 40c; 100, $2.50.
Striped and variegated mixed, each, 4c; doz., 40c; 100, $2.50.
Lemon's Butterfly (large strained) varieties mixed, each, 4c; doz., 40c; 100, $3.50.
GLADIOLUS SEED.

One of the most interesting branches of Gladiolus culture is the growing of bulbs from the seed. No skill or special care is required, and in the course of two or three years flowering bulbs will be secured. It is not only a very interesting and inexpensive way of securing a stock of bulbs, but there is almost sure to be found new sorts that are the results of hybridization and which could not be secured in any other way. Our lots of seed come from the finest flowers and embrace hundreds of markings and colors. Gladiolus seed, pkt., 10c; oz., 25c, postpaid.

DAHLIAS. The extraordinary beauty of the new varieties of Dahlias that have been recently added to the already large and wonderfully varied list, have renewed the old-time interest in this majestic flower. Certainly no flower is more worthy of special attention. Our assortments comprise all the positive colors, in most striking shades.

CULTURE. A good mellow soil, thoroughly enriched with well-rotted manure, and an abundance of water upon the plants as well as at the roots during dry, hot weather, is the secret of success. Water over-head is preferable to out-doors. Sprinlders flowers in the hottest, driest season, is the result. The tubers should not be put into the ground until settled weather, say May 20. Will begin orders any time, but will not fill until May 1.

CHOICE FRENCH CANNAS. The marvelous improvement made in Cannas the last few seasons have seen no equals in the history of floriculture. From a mere description no adequate idea can be gained of the striking colors, varied shades, hybridizations, and the matchless bloom, that distinguish so many of our six brilliant varieties, including the PEARL, DWARF EXCELSIOR, and the STAR. They commence blooming early in June and continue until late in September. Every shoot bears a flower, and so often as a truss of blossoms with a single bud, and the stem blooms 5 to 8 times in succession. We are now able to offer the great novelties of last season at less than half price. We urge our customers who have not already provided themselves with the new French Cannas to give them a trial.

MIXED CANNAS. Scarlet flowered kinds. Many splendid colors. Each, 15c; 2 for 25c; doz., $1.25.

MIXED CANNAS. Yellow flowered kinds. Many shades, varied and hybridized, etc. Each, 15c; 2 for 25c; doz., $1.25.

BEGONIAS. (Tuberous Rooted.) The flowers are very large and brilliantly colored, embracing every shade of pink, rose, white, scarlet, yellow and orange. Planted out-doors they present a dazzling show until killed by frost. Single: Scarlet, Orange, Pink, White, Yellow and Crimson. Each, 10c; doz., $1.00. Double: Scarlet, Orange, Pink, White, Yellow and Crimson. Each, 25c; doz., $2.50.

BEGONIA CULTURE. For growing in pots or boxes in the house, plant in rich, sandy soil, give good drainage and water freely after the leaves start, but do not let the soil become sour from over-watering. If it is desired to have a bed outdoors, select a shady, moist situation, making the bed rich with thoroughly rotted manure and leaf mold, if obtainable. Plant as soon as danger from frost is over. After the plants start into vigorous growth, keep well watered.

TUBEROSE. Double Dwarf Excelsior Pearl. The flowers of the Double Dwarf Pearl are larger and more numerous than in the common type. They are so fragrant that they perfume the atmosphere for some distance around.

CULTURE. Fill five-inch pots half full with cow manure, and on top of this good rich earth mixed with sand. When the weather is warm the pots may be set out-doors in earth. At the approach of cold weather the pots may be lifted from the earth and brought indoors.

TUBEROSE. Double Dwarf Excelsior Pearl (Chouc Bulbs). Each, 8c; doz., 85c. 100, $2.00, postage paid. By express at purchaser's expense, 100, $1.55; 500 @ 90c.

VARIATED LEAF TUBEROSE. This is an early single kind, with striped foliage. Each, 7c; doz., 90c.

ALBINO. Flowers single, star shaped, pure white. Each, 8c; doz., 85c.

CALADIUM ESCELENTUM (Elephant Ears.) A striking foliage plant. Leaves very large, often three to four feet long and nearly as wide. Very effective on lawns. Each, 15c; doz., $1.40. Extra large bulbs, each, 25c; doz., $2.50, postpaid.

CULTURE. Plant in rich soil and water freely.

OXALIS. Blossoms throughout the summer and fall. Foliage graceful and pleasing. White and rose pink. Doz., 8c; 100, 34c, postpaid.

GLOXINIA. Magnificent. Will bloom in six weeks from the planting of the dry bulb. Their splendid trumpet-shaped flowers are exquisitely tinted, blotted or tigered with minute dots of violet, pink or crimson. Bulbs, each, 10c; 3 for 30c. Seed, per packet of 100 seeds, 12c. Will bloom in three months from seed.

MADERIA VINE. (Mignonette Vine.) A climber with glossy green leaves. Flowers white and fragrant. Grows very rapidly and will cover the side of a small house in a single season. Each, 7c; 3 for 15c; doz., 50c, postpaid.

CINNAMON VINE. A climber that grows very rapidly, foliage bright and lively. Each, 7c; 3 for 15c; doz., 50c, postpaid.

New Dahlias, 15c each; doz., $1.60, postpaid.
IS YOUR LAWN FADING?

If so, Do not Disfigure Your Lawn, Offend Your Senses, or Fill Your Ground with Weeds by using Stable Manure, but apply EXCELSIOR LAWN DRESSING. EASILY APPLIED. NON-ODOROUS.

N. K. & CO.'S EXCELSIOR LAWN DRESSING. It is a fertilizer especially prepared for LAWNS. It possesses in its fertilizing nutrients the highest degree of concentration, and is composed from those constituents only, the most effective Lawn Dressing that has been derived, but it is the most pleasant to handle, being NON-ODOROUS, so that its liberal use on a lawn can not be detected by any unpleasant odor. It is instantly & EASILY APPLIED, and imparts such a VIGOROUS GROWTH to the grass that two or three applications during the season at the rate of one pound to each 100 square feet of lawn, is all that is needed. A flourishing condition of the sward, and enables it to withstand the effect of the hot summer sun. We prepare but one kind of Lawn Dressing and we do not believe it can be excelled. This we do not believe we do not believe it can be excelled. The Use of Excelsior Lawn Dressing on Flowers.

By its judicious use, the health, vigor and free blossoming character of flowers will be greatly enhanced. The result of its use on flower beds is quickly seen by the dark green leaves and high color of blooms produced. To fertilize bedding plants, stir a teaspoonful, or more, according to the size of the plant, into the soil about each plant, and repeat two or three times during the season. After the fertilizer is used, water the plants freely.

FOR HOUSEPLANTS, dissolve one teaspoonful of Fertilizer in one quart of water and use the solution freely about the plants, stirring the solution while applying. It may be applied as often as the plant seems to require it; once every week or ten days until they are in the desired condition.

POULTRY FOOD.

A Celebrated Artist, when asked with what he mixed his paints, replied "WITH BRAINS." Precisely so does a progressive Poultry Keeper mix his rations.

CRUSHED OYSTER SHELLS.

The most frequent cause of HENS NOT LAYING is the absence in the food of CARBONATE OF LIME. As CRUSHED OYSTER SHELL is practically pure Carbonate of Lime, it supplies, when fed to poultry, this most essential element, and greatly aids in the formation of the egg.

Advantages gained by the use of Oyster Shells.

It prevents "Cholera": It keeps the poultry healthy: It makes better layer and produces more eggs per day. It prevents soft shell eggs: It prevents Hens from eating their eggs: It makes the egg shell strong enough to carry without breaking: It contains many essential components of life: It makes eggs larger and heavier.

When you buy 100 lbs. of "Peerless" Brand Crushed Oyster Shells, you get 100 lbs. of Shells, not 15 to 20 lbs. of dust and dirt that comes in as our brand is specially cleaned.

To get best results in Poultry Raising, the use of something of the kind is positively necessary. Every poultry house should have a pan or trough full, so that the fowls can have access to them at all times. Put up in 100 lb. bags, our price, bag included 80c. per 100 lbs.

Our Catalogue of Poultry Supplies, is now in preparation, write for it. It will save you money.

MICA CRYSTAL GRIT.

Hens having no teeth, should be kept constantly supplied with some sharp material, to grind and masticate their food.

Mica Crystal Grit is superior to other forms, as it is not only sharp and hard, but its properties are such that it acts as a tonic, and contributes largely to the health and productive power of the Fowl. Our price, for 100 lbs., (bag included) 90c.

GROUND BONE. Per lb., 5c; per 100 lbs., $2.00; bags free.

Add 10 cents a pound for postage if wanted by mail

We handle large quantities of Bird Seed, and can supply it either mixed or in bulk. We desire to call special attention to our Sterling brand, and to our Recleaned Canary, Hemp, Millet, Rape, etc., and to our very reasonable prices.

N. K. & CO.'S STERLING BIRD SEED.

This mixture is so vastly superior to the mixtures usually put up under the name of "Bird Seed," (much of which is simply rubbish) as to cause the Sterling Brand, to meet with a steady sale wherever it is once introduced. It is an honest package of bird seed, made up from the finest and cleanest quality of re-cleaned Siely Canary, Russian Hemp, German Rape and Imported Millet, contains a large piece of Cuttle Bone and weighs without the package 16 ounces to the pound. It is always packed in a round box, with red wrapper and under our registered trademark. Price 10c a lb., 3lbs. for 25c.

The Lawn.

"We love the soft turf which is thrown like a smooth, natural carpet over the swelling outline of the smiling earth."—Downing.

OUR PAMPHLET ON LAWNS TELLS
HOW TO KEEP A LAWN GREEN,
HOW TO BUILD NEW LAWNS,
HOW TO REPAIR OLD LAWNS.
WILL SEND IT FREE, IF REQUESTED, WITH EVERY ORDER FOR LAWN GRASS.

N., K. & Co.'s Sterling Lawn Grass. We prepare three grades of Lawn Grass Seed, which are kept constantly in stock. The best of these mixtures is N., K. & Co.'s Sterling Lawn Grass, which has been used with the greatest success on thousands of lawns. This mixture is composed of a number of varieties best adapted to the purpose. Some of the grasses are early, others medium, and still others late. By this means as soon as one variety has ceased to be at its best, others are ready to take its place. Another important point is that by the use of many grasses, a much heavier sward is obtained than is possible with any two or three sorts, as no matter how much of one kind of seed may be on a given space, it will only support so many plants. If another variety, however, is sown in connection with it, a largely additional number of plants can be maintained, as they thrive on different elements in the soil. This mixture is unequalled for tennis and croquet grounds. Our Sterling, Qt., by mail, postpaid, 35c; qt., by express or freight, 25c; peck, $1.15; bu., $4.00, bags included. In 5 bu. lots, $3.75 per bu.

N., K. & Co.'s Park Mixture. This is a fine mixture, the grasses used in its combination being equally as good as those in the Sterling Lawn Mixture, but not containing as many varieties or some of the higher-priced sorts used in the Sterling Mixture. It has given excellent satisfaction, and we recommend it to those not wishing as expensive a mixture as the Sterling. Qt., by mail, postpaid, 25c; qt., by express or freight, 15c.; peck, 60c.; bu., $3.00.

N., K. & Co.'s Lawn Grass. Good Mixed. Where a fine lawn is wanted, we always recommend that the best seed be used. There are places, however, that are not conspicuous and where all that is desired is a good, healthy growth of grass, where a cheaper mixture will answer every purpose. No better lawn grass for the money can be obtained than our Good Mixed. Qt., by mail, postpaid, 20c.; qt., by express, 10c.; peck, 60c.; bu., $2.00.

Special Mixtures. We are at all times glad to make up special mixtures of lawn grass to meet the requirements of existing conditions. We have been very successful where combinations of grasses for terraces, shady places, exposed situations, etc., were wanted.

QUANTITY REQUIRED.

In order to secure quick and satisfactory results, a liberal quantity of Lawn Grass Seed should be used, as spots not seeded will surely be occupied by weeds. The usual rule is one quart for 200 square feet; four to six bushels for an acre.

Minneapolis, Minn., Jan. 3d, 1898.

NORTHRUP, KING & CO., Minneapolis,

Gentlemen: My Lawn at Highcroft consists of about eight acres, and was seeded with your Sterling Lawn Grass Mixture. It is a beautiful lawn, entirely satisfactory to me, and much admired by those who see it.

Yours very truly,
FRANK H. PEAVEY.

Strangers visiting Minneapolis almost invariably comment on the Beauty of its Lawns, both in the Public Parks and about the private homes. In a very large degree their fine appearance can be justly attributed to the uniform excellence of Our Lawn Grass Seed.

View in Loring park, Minneapolis.

OFFICE OF
BOARD OF PARK COMMISSIONERS.
MINNEAPOLIS, MINN.

January 16th, 1897.

NORTHRUP, KING & CO., Minneapolis, Minn.

GENTLEMEN: During the past twelve years, in which I have been Superintendent of Parks of Minneapolis, our park system has been built, and we have been obliged to seed large areas to grass each year. It allows me great pleasure to state that during all this time I have found your Lawn Seed of a UNIFORMLY HIGH QUALITY, both as respects STRONG GERMINATING POWER and FREEDOM FROM UNDESIRABLE SEEDS, besides producing a turf of FINE TEXTURE and GREAT DURABILITY.

Yours very truly,
W. M. BERRY, Supt.

The above statement from Mr. Wm. M. Berry, for the past twelve years Superintendent of Parks of Minneapolis, and for the fifteen years immediately preceding, Supt. of South Park, Chicago, is a notable one, coming as it does from one of the most widely known and experienced Park Superintendents in the United States, and covering as it does, twelve years continuous use of our Lawn Grass Mixtures in large quantities.

"HIGHCROFT."

Country Residence of Mr. F. H. Peavey.
The DOUBLE-TUBE Lightning Insect Exterminator, No. 2.

IT EXTERMINATES EVERY INSECT obnoxious to yourself, your animals or your crops.

Within the past few seasons it has been discovered and thoroughly proven that the proper way to apply insecticides is by means of a sprayer or atomizer, not only for economy of material, but that the work is performed far more effectively, as the spray will penetrate where the liquid cannot be applied directly.

Last season there was an enormous demand for Sprayers, and this led to the construction of many Sprayers or Atomizers, some of them good; some of them poor. We have examined carefully every

If you have seeds going in this way, a sprayer can be put in without any appreciable extra transportation charge.

No. 1 Lightning Atomizer. This is a Single Tube Sprayer, low in price, yet effective and durable. It has detachable reservoir, enameled inside and out to prevent rusting. It is thoroughly practical, and has given entire satisfaction to thousands of purchasers. Price each, 45 cts.

With every Sprayer is furnished complete instructions for use, and formulas for the best emulsions, disinfectants, etc., the materials for which can be obtained cheaply at any drug store.

Mr. D. C. Carpenter:

You ask me what I think of the WHITE HULLESS BARLEY. I have grown 60 bushels to the acre, and it is the best grain to sow for hay that grows. Sow early and you can cut two crops from the same sowing.

As fattening feed for hogs it has no equal. It makes sweeter meat and nicer lard by far than corn. I fattened 20 hogs for one butcher here with it, and made a gain of 106 lbs. to the hog in five weeks. The butcher said that he never handled such fine pork before.

I have tried feeding it in all ways, and I find the best way is to grind it and feed dry, with clear cold water in another trough for them to drink out of. It grows very quickly and on any kind of soil. You can sow it after all other grain is sowed, and harvest it then before wheat and oats are ready. I have sown it as late as the 18th of June and made a good grain crop. Stock will eat the straw in preference to "slough" hay. The straw is small, with very heavy leaves. It stools wonderfully. Once used for hay for work horses, you would n't have any other.

For Flour it discounts Buckwheat. We use it all the time for hot cakes.

Yours truly,
D. C. CARPENTER.

For Grain sow 1½ bushels to the acre. For Hay 2 bushels. Price, 1 lb., postpaid, 30c.; peck, 75c.; bushel, $2.00; 2 bushels, $3.50; 10 bushels, $15.00. Bags included.

For 10 cents a sample of this unique and valuable Barley will be sent to those who wish to inspect it before purchasing.

SPECIAL NOTICE. Last year we could hardly begin to fill the orders we received for WHITE HULLESS BARLEY and were obliged to return money to many who ordered late.

We anticipate an enormous demand for it this season, and as our supply is not large, we urge early orders from those wishing to secure seed.

NORTHROP, KING & CO., Seed Growers, MINNEAPOLIS, MINN.
